The Ugly Goblin's Classless COMBAT Skill Tree™

V4

And How to Use It!

About this Skill Tree System

Welcome to the world of the Classless Skill Tree!

Levelling in your characters through this skill tree system is going to be very different to your usual D&D experience. I believe it adds more freedom to your character creation. Allowing you to easily optimise in more unique and personal builds that more strongly reflect your vision for your character. You will progress through 3 different skill trees simultaneously, developing your combat, roleplay and crafting abilities. In the skill tree discussed in this document, we will be covering “combat”, as well as how to build the base of your character before they begin levelling up in any skill tree.

Now I will take you through the step by step process in building your character.

Step 1: Ability Scores and Race/Species

Decide with your DM and players if you will be choosing, Point Buy, Rolling for Stats, or going with Standard Array.

Ideally Point Buy works best for this, giving you the most freedom in customisation.

DMs when letting your players pick their race/species, consider allowing them to choose where they put their +2 and +1 ability bonuses, instead of what the race’s description recommends.

Step 2: Make your “**Starter Pack**”

This will be your starting equipment and proficiencies for your character. The general barebone essentials if you will.

Instead of choosing a background, you will **pick 4** of the options below.

Feel free to take multiple of the same thing, but you may only pick 4 options in total.

Keep in mind, you can only choose a maximum amount of certain options.

Note: If you choose to take any “Gold Pieces”, you can purchase any equipment found in the Player’s Handbook, with the gold you have.

If you don’t choose any gold you will start the game with NO EQUIPMENT!

1 Skill Proficiency (Max 2)	1 Tool/Kit Proficiency (Max 2)	2 Instrument and/or game Proficiencies	1 Vehicle Proficiency
1 Extra Language	2 “Kits” (Healer’s Kit, Adventurer’s Pack etc.)	2 Sets of Tools	50 Gold Pieces

Step 3: Build-a-Base

In this step you will build the “Base” of your *Classless Character*.

Firstly, you choose **two ability scores**, one of which being *strength, intelligence or charisma* and the other being *constitution, dexterity or wisdom*. You gain **proficiency in saving throws** with these chosen abilities.

Here you have **8 Base Points (BP) to spend**. The price of each ability, tool, cantrip etc. that you choose will be listed across from them.

Note: If you purchase the “Heavy Armour Proficiency”, you also gain proficiency in every armour type below it. Similarly, if you purchase proficiency in Martial weapons, you Also gain proficiency in simple weapons. There is no need to double dip!

Note 2: It costs no points to become proficient in the use of daggers and one other simple melee weapon of your choice, but you may only purchase this once.

Ability / Proficiency / etc.	Cost (BP)
+ 1 Skill Proficiency (Max 4)	1
+ 1 Feat	4
Armour Proficiency	
Heavy	3
Medium	2
Light	1
Weapon Proficiency	
Martial	2
Simple	1
Shield Proficiency	1
+ 1 Tool Proficiency	1
+ 1 Cantrip	1
+ 2 Extra Languages	1
Proficiency in Daggers and 1 additional	0

Simple Melee Weapon (Max 1)	
-----------------------------	--

Step 4: The Skill Tree

You are now ready to dive into the skill tree below.

To start, your character's maximum Hit Points equal 5 + their Constitution modifier. **You will not automatically gain hit points as you level up like you typically do in D&D 5e.** Instead, you will need to purchase more Hit Points on the Skill Tree, using Level Points (LP) (More on that shortly).

A Note on Hit Dice & Purchasing Nodes

- Your character has a number of Hit Dice equal to their level. The type of dice your character uses when rolling hit dice, on a short rest or at any other time, is based on the types of nodes they have purchased.
- If you have spent more LP in **Blue/Mystical Nodes** (cross hatch pattern [to be added]) than any other type of node, your Hit Dice are **d6s**
- If you have spent more LP in **Green/Technical Nodes**, (diagonal pattern [to be added]) than any other type of node, your Hit Dice are **d8s**
- If you have spent more LP in **Red/Physical Nodes**, (spotted pattern [to be added]) than any other type of node, your Hit Dice are **d10s**
- If it is a draw, choose the higher Hit Dice.

Important note on Dual Nodes:

- Yellow, Pink & Teal nodes are considered "Dual Nodes", and a purchase in one of these nodes count as having spent 1 LP in both nodes on either side of that branch of nodes.
- For example, if I spent 1LP in a yellow node, it counts towards having spent 1LP in both the Technical and Physical branches.
- If you have only purchased **Colourless Nodes**, your Hit Dice are d8s (or d12s if your DM wants to reward you for such an achievement)

Hit Dice: Optional Rule

Hit dice not only can be spent during short rests to restore hit points, but also **can be spent to restore mana**. Now that you have more uses for your hit dice, this hopefully will give your party more incentive to take a short rest.

And now you need to decide: do you spend your hit dice on recovering your health or do you restore your mana instead?

How Levelling Works:

You will gain a certain number of Level Points (LP) when you first create your character and the same amount each time you level up after that.

Starting at Level 1 and each time you level up after that, you will gain **4 Battle Points (BP)** to spend on the [Classless COMBAT Skill Tree](#), **2 Roleplay/Role Points (RP)** to spend in this [Classless ROLEPLAY Skill Tree](#), and **1 Artisan Point (AP)** to spend in the Classless CRAFTING Skill Tree (see below).

BP, RP and AP are all considered to be **Level Points (LP)**

You can only spend Level Points once after levelling up. If you have any unspent LP, they can only be spent again when you next level up.

Keep track of any unspent LP, as it will carry over and can be spent the next time you level up.

Different Game Modes

BP, RP and AP are distributed in a ratio of **4:2:1**, which is ideal for a typical “*Dungeons & Dragons Experience*”. However, feel free to play around with this ratio. Below are some examples of completely different games you can run by simply tweaking this ratio.

Anime Vibes (Fun Mode)

If you want to really juice up the experience and really encourage players to get creative, experiment and come up with some exciting builds, the **5:3:1** ratio is recommended.

This was the original ratio for this system and still loved by most.

However, if using this I recommend changing the BP requirement for the “ultimate abilities” into the far corners of the skill tree to needing and investment of 25 BP in that branch instead of 20. Additionally Extra Attack, Arcane Bond and a few others should probably have their cost changed to 5BP

Gritty Realism

Only award players **4 LP** in total that they can spend across any of the 3 skill trees of their choosing.

Also consider only allowing players to spend **Level Points** during a *Long Rest*.

Farming Simulator

For anyone looking to replicate experiences from games such as *Stardew Valley*, *Moonlighter* and *Minecraft*, consider **Reversing the Ratio**, and play with a LP distribution of **1:2:4**

Political Intrigue

For those looking for a political heavy or RP focused experience, consider a ratio of **1:4:1**

This is great for replicating the vibe of *Call of Cthulhu* or other horror or mystery focused adventures.

How to use the Skill Tree:

Intro

- Treat the Skill Tree as a series of doorways.
- Each shape on the skill tree is called a “**Node**”.
- Each line connecting Nodes is called a “**Branch**”.
- Each time you spend points in a Node to gain abilities from it, you “**Unlock**” that Node.
- You can only purchase from **Nodes** you have already **Unlocked**, or **Nodes** connected (via **Branches**) to a Node that you have already **Unlocked**.
- Simply put, if you have purchased an ability from a Node, you can continue to do so, as many times as that Node allows
- You can also purchase from nodes, connected to Nodes you have previously purchased from.
- The cost to purchase an ability from a Node is written in the node’s description. This is how many **LP** you must spend to gain that ability.
- Purchasing from a node multiple times will give you additional benefits from that ability (see their descriptions for more information.)

For example: purchasing from the “Sneak Attack” ability, will increase the sneak attack damage you deal by 1d4 for each purchase made on this tree.

Dual Nodes: Pink, Teal & Yellow

You might notice that there are different coloured nodes found between the main 3 red, green and blue (physical, technical and mystical) branches of the skill tree. These pink, teal and yellow nodes are known as **dual nodes**, and are considered to share properties from their neighbouring branches.

The yellow branch’s nodes are considered to be both physical and technical.

The teal branch’s nodes are considered to be both technical and mystical.

And the pink branch’s nodes are considered to be both mystical and physical.

Any LP spent in a **dual node**, is considered spent in both of its neighbouring branches at the same time.

For example, when I spend 1LP in the “+1 Stance” node, which is yellow, I would take note that 1LP has been spent in a physical node and 1LP has also been spent in a technical node.

Where to Start?

To begin, the central node labelled “**Colourless Ability**” is always considered “**Unlocked**”.

You begin your journey here, and can purchase abilities from this Node whenever you are able to spend **LP**.

From here, you can spend LP in any Nodes connected to this central node..

You have 5 LP to spend right from the get go. So get spending!

Happy Levelling!

Nodes: Physical, Technical & Mystical

Each of the nodes on this skill tree represent a different aspect of your character, and the branches you decide to travel down tell the story of who your character is and what they have decided to focus on in their lives.

Physical, red nodes, represent your character's connection to their physical body and primal senses. They represent your character's health, physical well being and attunement to the raw and grounded aspects of life as well as their raw emotions.

Technical, green nodes, represent your character's skill and finesse. These nodes focus on cleverness and technical prowess. Anyone specialising in this branch of nodes will learn combat techniques, clever tricks as well as unconventional uses of magic.

Mystical, blue nodes, represent your character's attunement to the arcane and their connection with what lies beyond the physical. Dedication to this branch represents your focus on spellcraft and the arcane arts. You learn to harness the weave of magic or perhaps some other eldritch or psychic power laying dormant within you.

The Mystical Branch & Spellcasting

Mana & Spell Slots

Spellcasting does not work in the same way it typically does in Dungeons & Dragons 5th Edition. For starters, this Classless Skill Tree System does not use spell slots in the traditional sense and instead relies on mana to cast spells. When a spell or ability requires a spell slot, such as the casting of a 1st Level Spell, or the use of a Divine Smite, you must convert a certain amount of your mana into a Spell Slot. You can only create Spell Slots equal to the level of spells you know how to cast.

For example, if you do not know any 1st level spells, then you cannot create a 1st level spell slot.

Spellcasting

Similar to Dungeons & Dragons 5th Edition, this system relies on you using a mental ability to cast your spells, such as intelligence, wisdom or charisma. However, unlike D&D 5e, the ability that one uses to cast spells may change quite often. Whenever you spend LP on a mystical node for the first time, you must decide which ability score will be used for your "spellcasting ability". You may choose from either intelligence, wisdom or charisma.

This "spellcasting ability" can be changed to a different mental ability of your choice, whenever you spend LP in a mystical node any time after.

Learning Spells

Every spell you learn, after purchasing one from the "+1 spell" node, is always considered to be prepared. There is no "preparing spells" when using this skill tree.

When you read about purchasing spells from the "Spell" node's description, you will notice that certain spells are unavailable to purchase unless you have the required amount of mana in your

mana pool. This means that you cannot purchase a 2nd level spell, for example, until you have a maximum amount of mana in your mana pool equal to or more than 10.

In order to have a maximum mana pool of 10, you would have needed to purchase from the “Mana” node 5 times, gaining 2 mana from each purchase.

When you purchase a spell higher than level 1, you do not reduce your mana in order to do so.

However, casting a 2nd level spell would require you to spend mana.

Spending Mana

The cost to make a spell slot using mana is not a 1:1 ratio. Instead you spend the corresponding amount of mana listed on the table below.

When you spend mana, think of it like a “mana bar” in video games. Mana is not gone forever when spent. When you take a long rest, you regain all of your spent mana, bringing your mana pool back up to full. Alternatively, you can also spend hit dice during a short rest, to recover any spent mana. See: [Restoring Mana with Hit Dice](#)

Spell Level	Point Cost
1st	2
2nd	4
3rd	6
4th	8
5th	10
6th	12
7th	14
8th	16
9th	20

Casting High Level Spells

You may only cast one 7th, 8th and 9th level spell per day. If you choose to cast an additional 7th, 8th or 9th level spell in a day you must make a constitution saving throw where the DC is equal to 10 + the spells level. On a successful roll, the spell is cast. On a failed roll the spell is not cast and you gain 1 level of exhaustion.

Skill Tree Abilities:

Colourless Abilities

You can purchase from this centre node at any time and it is always considered “unlocked”, connecting you to the Health, Mana and Stamina nodes, right from 1st level.

When you purchase from this node, you can choose from any of the abilities listed below. Keep in mind, each of the abilities listed have a different LP cost.

Ability Score Increase

Cost: 2 LP

When you purchase this ability, you can increase one of your Ability Scores by 1.

Armour Proficiency Upgrade

Cost: 1 LP

When you purchase from this node you can gain proficiency in the next tier of armour above the armour type you were proficient in before purchasing this node.

For example, if you were proficient in Light Armour, you are now proficient in Medium Armour. If you were proficient in Medium Armour, you are now proficient in Heavy Armour.

Feat

Cost: 4 LP

Grants you a new feat when you purchase this node.

Weapons

Cost: 1 LP

When you purchase this ability, you choose 1 weapon tag (*versatile, light, heavy etc.*) and gain proficiency in all weapons that have that weapon tag. If you choose the “special” weapon tag, then you can instead only choose two weapons with this tag and gain proficiency with them.

You can alternatively choose two specific weapons when purchasing this ability, and gain proficiency in those weapons.

Red Nodes: Physical

Adrenaline

Cost: 1 LP

Each purchase of this node increases your Max Adrenaline Score by 1. A player's Adrenaline score can be no higher than twice their proficiency modifier.

A player's adrenaline score works differently to the likes of Mana and Stamina and which all start at their maximum and can be reduced as they are spent.

Instead, a player's Adrenaline increases by 1 any time they are hit with an attack, would receive damage or whenever they successfully hit a creature with an attack.

However, their Adrenaline is reduced by 1 at the end of their turn if they did not make an attack during that turn.

Whenever a player with Adrenaline hits a creature with a weapon or unarmed attack they can deal additional damage equal to their current Adrenaline score.

However, any time a creature with adrenaline takes damage, they take additional damage equal to their current Adrenaline score

Once per turn you can also spend 2 Adrenaline to spend a hit dice and regain that many hit points + your Constitution Modifier.

Once per turn, you can spend 4 adrenaline to take one additional action on top of your regular action and a possible bonus action. **You may not cast spells using this action and attacks made with this additional action cannot increase your Adrenaline.**

You cannot Concentrate while you have Adrenaline.

Health

Cost: 1 LP

When you purchase this node you gain hit points equal to 5 + your constitution modifier. You may only purchase from this skill tree a maximum number of times per level up, equal to your proficiency modifier

Rage

Cost: 2 LP

When you purchase this node you select a Rage from the list below. When you have 2 or more Adrenaline, you can choose to enter one of the Rages below that you have purchased from this node and gain the benefits of that chosen Rage.

This rage lasts so long as you have adrenaline.

List of Rages

- **Adamant Rage:** You cannot be grappled, restrained, knocked prone or moved against your will, while this rage is active. Additionally, you can spend 1 Adrenaline to Dash as a bonus action. Also, if you are petrified, stunned or paralyzed, or can spend 2 adrenaline to remove one of these conditions.
- **Avenging Rage:** While this rage is active, whenever an ally within 15ft of you takes damage, you can dash as a reaction and make a melee attack against whoever dealt that damage. If an ally you can see falls unconscious, due to an enemy's actions, while this rage is active, the next attack you make counts as a critical hit.
- **Cold Rage:** While this rage is active, the additional adrenaline damage you deal is also applied to any spell you cast. You can also maintain concentration while you have adrenaline but make checks to maintain concentration at disadvantage.
- **Demonic Rage:** While this rage is active, your adrenaline damage bonus is doubled. But any adrenaline damage received is also doubled. This additional damage can either be fire, necrotic or radiant damage, you choose. If you reduce a creature to zero hit points while this rage is active, you can dash and make one additional attack against another creature as a bonus action.
- **Eldritch Rage:** Your melee reach increases by 10ft, while this rage is active. Additionally, all damage you deal, while this rage is active, is psychic damage.
- **Reckless Rage:** All attacks you make, while this rage is active, are made with advantage. However, all attacks against you are made at advantage. If you move at least 15ft during your turn, your AC increases or decreases by 2, your choice, until the start of your next turn. Finally, if your hit points are below half their maximum, your adrenaline increases instead by 2 any time you take damage.

- **Undying Rage:** While this rage is active, if your hit points are reduced to 0 they instead are reduced to 1. When this happens, you gain 1 level of exhaustion. Any healing you receive, while this rage is active, is increased by twice your current Adrenaline score.

Frenzy

Cost: 2 LP

When you purchase from this node you learn to tough out any harm that comes your way.

When you take damage, you can spend your reaction to ignore that increment of damage and all damage you would take until the start of your next turn. However, at the start of your next turn you gain 1 level of exhaustion.

Additionally, so long as you have 3 levels of Adrenaline you gain resistance to Bludgeoning, Piercing and Slashing damage from non magical attacks.

At 10th level this resistance also applies to magical forms of Bludgeoning, Piercing and Slashing damage.

You can use your Frenzy ability a number of times per day equal to the amount of times you have purchased this node.

Grit

Cost: 1 LP

Whenever you make a Strength, Dexterity or Constitution Saving Throw, after making the roll but before the outcome is decided, you can choose to increase the roll you've made by sacrificing your own hit points.

For every 5 hit points you spend you can increase the result of your roll by 1.

The number you can increase your roll result with Grit can be no higher than the amount of LP invested in this node.

Additionally, you can end a condition or magical effect on your person by spending 5 hit points as an Action.

However, if the effect is due to a spell effect, you must spend a number of hit points equal to the spell's level x 5.

You can use this secondary effect a number of times per day equal to the amount of LP invested in this node.

Regen

Cost: 2 LP

At the start of your turn, you regain 1 hit point for every purchase made in this node. If you take acid or fire damage before your turn, or are incapacitated, you do not gain the benefits of this

ability. This ability works much slower outside of combat and instead only heals you by the same amount whenever you spend hit dice to regain hit points.

You can purchase from this node a number of times equal to your level

This does not count as a form of “healing”.

With each additional purchase you may choose how your regeneration ability mutates, choosing a mutations below you have not chosen before:

Accelerated Healing

You learn how to spend stamina to speed up your Regen’s healing process. At the start of your turn when your Regen ability activates you can choose to spend any number of stamina and regain additional hit points equal to your proficiency modifier for each stamina spent.

Rapid Recover

During long rests you remove 1 additional level of exhaustion.

Regenerate Limb:

Your Regen grants you the ability to regenerate a missing limb during a long rest. During this time you cannot remove any levels of exhaustion and gain 3 levels of exhaustion the next day.

Slow Age

Your Regen ability slows your aging process making you age at half the speed, doubling your life expectancy.

Variant Regen Rule:

Feel free to chat with your DM about the possibility of swapping the damage types provided here with two different damage types that might better fit the flavouring you are going for with this build. Perhaps you are designing a “Groot” like dryad creature and maybe cold or necrotic damage should prevent you from healing.

Thorns

Cost: 1LP

As a reaction, a creature within 30ft of you would cause you to lose hit points (from an attack, spell, ability or the use of your Protect Node), you can choose to deal damage to that creature equal to the amount of LP invested in this node.

The damage dealt by your Thorns ability is the same as the type of damage you received.

The amount of LP invested in this node cannot exceed your level.

Speed

Cost: 1 LP

When you spend a point in this node, you gain a movement speed from your choice of one of the options below. If you already have a movement speed in the selected option, you instead increase that movement speed by the mentioned amount:

Movement Speeds:

- Walking: 10ft
- Swimming 10ft
- Climbing: 10ft
- Flying: 5ft (cannot be wearing medium or heavy armour).

LIMIT BREAK

Cost: 5 LP

Requires: At least 20 LP to have been spent in Physical nodes

When you purchase this node you can select one of the following abilities from the list below. It requires an action to activate a Limit Break ability, and when you have done so, you cannot activate a Limit Break ability again, until you finish a long rest. Additionally, you can only activate a Limit Break ability when you have less than half of your maximum amount of hit points remaining. As you activate your Limit Break, your Adrenaline score increases to its maximum. If you have not invested in the Adrenaline node you gain 3 Adrenaline regardless. Your Limit Break lasts for 1 minute or for as long as you remain below half your hit points, unless otherwise stated. While your Limit Break is active you gain twice as much Adrenaline as you usually would. You can also choose to dismiss your regen ability while your Limit Break is active.

Note: *All of the Limit Breaks listed below have interchangeable names. Please do not feel obliged to stick with the names listed, nor the flavours they suggest.*

For example, Blood Drinker implies that you drink the blood of your enemies, but please feel free to change this up. Perhaps you sap someone's fighting spirit with each hit or even feed on your enemies' fear. Adrenaline Junkie could be more focused on a cocky attitude and you could call it "Ego Boost".

Please make these ultimate techniques your own.

Desperate Smite

While you have adrenaline, all attacks you make are made at advantage. When you activate this Limit Break you immediately make an attack. The first attack you make that hits its target, deals additional damage equal to your maximum hit points - remaining hit points. You may choose from the list below what type of additional damage this deals:

- Fire
- Cold
- Lighting
- Thunder
- Acid
- Poison

- Necrotic
- Radiant

Relentless Endurance

While you have Adrenaline while this Limit Break is active, you become resistant to all damage types and become immune to bludgeoning, piercing and slashing damage, so long as your hit points remain below half of your maximum hit point total.

Unkillable

While this Limit Break is active, you are unable to die or fall unconscious so long as you have adrenaline. You do not roll death saving throws while you have adrenaline remaining.

Adrenaline Junkie

While you have adrenaline, anytime an attack misses you or you succeed on an ability saving throw, you gain 1 adrenaline. Your speed also increases by 10ft for every adrenaline you have.

Blood Drinker

This Limit Break instead lasts until your hit points are full or you take a short or long rest. Any time you deal damage to a creature while this Limit Break is active, you regain hit points equal to the amount of damage you dealt. Any damage you deal this way, cannot be restored until that creature takes a long rest. If you are no longer missing any hit points, this ability ends.

Green Nodes: Technical

Exposing Strike

Cost: 1 LP

When you purchase from this node, you may choose 2 exposing strikes from the list below. When you deal sneak attack damage to a creature, or make a successful attack against a creature that you had advantage against, you may spend stamina to afflict them with the effects of one of your exposing strike abilities. The amount of stamina required to afflict a creature with one of these abilities is listed in each ability's description.

A creature affected by an exposing strike condition, can make a constitution saving throw at the end of their turn to attempt to remove the effects of 1 exposing strike they condition they are subjected to. The DC for your stunning strikes is equal to your charisma, intelligence or wisdom modifier + your proficiency modifier + 8.

- **Deafening Strike:** The creature cannot hear. (*Stamina Cost: 1*)
- **Debilitating Strike:** The creature has disadvantage on the next saving throw they make. (*Stamina Cost: 1*)
- **Dizzying Strike:** When this creature moves on their turn, they roll a d8 and move in that direction instead. (*Stamina Cost: 1*)
- **Exposed Strike:** The next attack against this creature has advantage. (*Stamina Cost: 1*)
- **Frightening Strike:** The creature is now frightened of you. (*Stamina Cost: 1*)

- **Poisoned Strike:** This creature is considered poisoned and takes 1d4 of poison damage at the start of each of their turns. This ability can stack; if you use it a second time and the previous condition still remains active. (*Stamina Cost: 1*)
- **Silencing Strike:** The creature cannot speak. (*Stamina Cost: 1*)
- **Slowing Strike:** You reduce this creature's movement speed by 10ft, for 1 minute. If this creature's movement speed is reduced to zero in this way, they fall prone. This ability can stack, reducing their movement speed by an additional 10ft for each use. (*Stamina Cost: 1*)
- **Stunning Strike:** The creature makes a constitution saving throw against your stunning strike DC. On a failed save they are stunned until the end of their next turn. (*Stamina Cost: 2*)

Flourish

Cost: 1 LP

When you spend a point in this node, you can choose to learn 2 of the Flourishes from the list below. Typically, when you make a weapon or unarmed attack, but before you deal damage, you can choose to add a flourish to that attack, by spending the required amount of stamina to do so. Most flourishes cost 1 stamina, but others may require more. You can only use one flourish per attack but are not limited to the amount of flourishes you can make per round. Take note that some flourishes are limited to certain types of weapons such as melee or ranged attacks. **Flourishes cannot be used when casting spells.**

- **Trip:** Costs 1 (or more) stamina point(s). Make a contested athletics or acrobatics check with the creature you attacked; if you used a ranged attack, you must instead make a sleight of hand check. If you succeed, that creature is knocked prone. When you make this check you can add 1d4 to your skill check. You can add 1 additional d4 for every additional point of stamina spent.
- **Bull Rush:** (*Melee Only*) Costs 1 (or more) stamina point(s). Move 10ft forward (+5 additional feet per stamina used) and push the creature you attacked that far with you. If the pushed creature hits a hard surface (wall, large object etc.), they take 1d4 of bludgeoning damage per stamina used.
- **Disarm:** Costs 1 (or more) stamina point(s). Make a contested sleight of hand or strength check with the creature you attacked. If you succeed, that creature drops one item of your choice that they are holding. When you make this check you can add 1d4 to your skill check. You can add 1 additional d4 for every additional point of stamina spent.
- **Riposte:** Instead of being used when you make an attack, **you can instead use this flourish as a reaction when you are attacked.** You can spend a number of stamina points to increase your AC by that amount +1 until the start of your next turn.
- **Dodge Roll:** Spend 1 stamina to move 10ft and increase your AC by 2, until the start of your next turn.
- **Cleave:** If you reduce an enemy to 0 hit points with an attack, you can spend 1 stamina to inflict any leftover damage from the attack, to an adjacent creature.
- **Grab:** You can spend 1 stamina point to grapple a creature the same size as you or smaller that you have hit with an attack.

- **Sweep:** (*Melee Only*) You can spend 1 or more stamina to have any creature(s) of your choice, adjacent to the attacked target, take 1d4 damage per stamina spent.
- **Smash:** (*Melee Only*) Reduce the target's AC by 1, until the end of your next turn, for every 1 point of stamina spent.
- **Chug:** Costs 1 (or more) stamina point(s). After making an attack you can additionally chug 1 potion as a free action. If it is a healing potion you gain +1d4 additional healing per stamina spent. If it is a magical effect, the effect lasts for 1d4 extra rounds per stamina spent.
- **Meteor Shot:** (*Ranged Only*) **Spend 1 stamina before you make an attack**, to fire your attack into the air. Instead of selecting a creature to attack, you choose one 5ft space within range. If a creature is in the area at the start of your next turn, your attack automatically hits that creature.
- **Multishot:** (*Ranged Only*) Spend 1 or more stamina to make one additional attack per stamina spent, each additional attack deals 1d4 damage.
- **Pinning Strike:** (*Ranged Only*) Spent 1 stamina to reduce a targets movement speed to zero until the end of their next turn. Target can spend an action on their turn to free themselves and move.
- **Uppercut:** (*Melee Only*) Spend 1 stamina point to knock a creature (large or smaller) 5ft into the air. Any grapple checks made against the target are made at advantage and they have disadvantage against dexterity saving throws until the start of their next turn.

Foe Feller

Cost: 2 LP

When you purchase this node, you can select a creature type below that you specialise in fighting; learning how to fight against and like them.

You gain a +1 to all attack and damage rolls against your chosen creature type as well as any benefits listed below.

You may only purchase from this node a number of times equal to half your proficiency bonus (rounded down).

Aberration

While fighting an Aberration, you can spend 2 stamina as part of the attack against the Aberration to gain 10ft of reach if it's a melee attack or to ignore half and $\frac{3}{4}$ cover if it's a ranged attack. If you kill an Aberration while you possess this ability you learn how to use this ability against non-aberration creatures.

Beast

While fighting a Beast, as part of your attack you can spend 1 stamina to gain advantage on the attack against the beast so long as an ally is adjacent to it.

Celestial

Whenever you hit a Celestial creature with an attack, you can spend 1 stamina force it to make a Constitution saving throw against the attack roll or have its speed reduced to 0 until the start of your next turn.

Construct

After reducing a Construct to 0 hit points, you can spend 3 stamina to absorb a fragment of their power. Once within 1 week of using this ability, as an action you can Polymorph yourself into an inanimate object of your choice, becoming indistinguishable from another of its kind. If you move, make an attack roll or cast a spell while in this form, the effect ends and you return to your normal form.

Dragon

While fighting a Dragon as an action you can spend 2 stamina to leap up to 40ft and immediately make an attack against it. If you kill a Dragon while you possess this ability, you learn how to use it on other non-dragon creatures, larger than you.

Elemental

Once per turn, while fighting an Elemental can spend 2 stamina as part of your attack against it to have your attack ignore its damage resistances or immunities.

Fey

You can spend 2 stamina as a bonus action to converse with a Fey creature you can see within 30ft and force them to make a contested deception check against your insight. If you succeed you glean an inkling of the creature's true name, for but a moment and always know where they are for the next minute. During this time you cannot gain disadvantage on attacks against them. If they succeed they become immune to this effect for the next hour.

Fiend

Once per turn, if you hit a Fiend with an attack you can spend 2 stamina to regain hit points equal to your level.

Giant

If you hit a Giant with an attack you can spend 2 stamina to force it to make a contested acrobatics check against your athletics. If they fail, the giant falls prone.

Humanoid

You lower the number needed to score a critical hit against humanoids by 1. If you get a critical hit against a humanoid with a CR lower than 1 you can spend 2 stamina to behead them. If the creature needed their head to survive, they instantly die.

Monstrosity

When a Monstrosity hits you with an attack but before damage is dealt, you can spend 1 stamina as a reaction to become resistant to one of the damage types dealt by that attack until the start of your next turn.

Ooze

As part of your movement action you can spend 2 stamina to end your turn in the same space as an Ooze creature. Any damage you would receive while in the same space as the Ooze is halved with the Ooze receiving the same amount. At the start of your turn if you are still in the same space as an Ooze you must spend 1 stamina or be pushed 10ft away from the Ooze in a random direction.

Plant

You can spend 2 stamina as an action to “root” yourself, gaining the “rooted” condition. While “rooted” you cannot be moved against your will. At the start of each of your turns you must spend 1 stamina to maintain your “rooted” or this condition ends. Additionally if you move on your turn the “rooted” condition ends.

While “rooted” you regain 10 hit points at the start of each of your turns and your AC increases by 2. However, while “rooted” you gain a vulnerability to fire damage and automatically fail dexterity saving throws.

Undead

If you reduce an Undead creature to 0 hit points you can spend 1 stamina to deal 1 radiant damage to that creature, or to learn how or if that creature has a means of returning to life.

Sneak Attack

Cost: 1 LP

When you spend a point in this node, you gain an additional 1d4 which can be added to your sneak attacks. Sneak attacks work the same way as they do in the PHB, requiring you to either have advantage against a creature or have an ally be adjacent to your target. You may only make one sneak attack per turn and when you do, you deal a number of d4s of extra damage equal to the number of times you have invested in this node.

You can only purchase from this node a number of times equal to your level.

Stamina

Cost: 1 LP

When you spend a point in this node you gain +2 Stamina to add to your Stamina Pool.

Stamina can be spent to use certain abilities such as Flourishes, Grapple Moves, Exposing Strikes or Tricks. You can only spend a number of stamina points equal to your proficiency modifier each turn.

You regain all of your stamina after taking a short rest.

Any unspent stamina you have when taking a short rest is converted into temporary hit points come the end of that short rest. These temporary hit points disappear after 1 hour, or until you take your next short or long rest.

Each time you earn a certain amount of stamina your body becomes fitter, gaining access to 1 trick or flourish, or gaining access to one of the Athletic Advancement abilities below. You may always choose from previously listed Athletic Advancements you have not gained access to.

Size of Stamina Pool Reached	Gain...	or...1 Athletic Advancement (Optional)
5	1 Trick or Flourish	Fit: Increase the amount of stamina you can spend per turn by 2. <i>OR</i> Breather: As an action you can spend a hit dice and regain stamina equal to the roll result.
10	1 Trick or Flourish	Good Form: Become proficient in the <i>Athletics</i> or <i>Acrobatics</i> skill. <i>OR</i> Runner: Increase your walking speed by 10ft
15	1 Trick or Flourish	Fitter: Increase the amount of stamina you can spend per turn by 2. <i>OR</i> Strong Lungs: When you use your Breather Ability you can spend a number of hit dice equal to your Constitution Modifier.
20	2 Tricks and/or Flourishes	Stance Dancer: Whenever you use a Flourish or Trick you can immediately enter a Stance but still spend stamina to do so. <i>OR</i> Quick Recovery: You can now spend a bonus action to use your Breather ability.
30	2 Tricks and/or Flourishes	Fittest: Increase the amount of stamina you can spend per turn by 2. <i>OR</i> Breath Master: You can use your Breather ability to recover <i>mana</i> or <i>hit points</i> once per turn.

Trick

Cost: 1 LP

When you spend a point in this node, you can choose 2 tricks from the list below. A trick, occasionally referred to as a “dance”, is typically some sort of quick manoeuvre to gain an edge on the battlefield. You can complete a 1 trick per turn. A trick can be executed by spending either 1 stamina or by taking a bonus action to do so.

- **Dodge**
Take the dodge action (this costs 2 stamina and bonus action to use)
- **Dash**
Take the Dash action
- **Disengage**
Take the Disengage action
- **Hide**
Take the Hide action
- **Tumble**
Costs: Your reaction and 1 stamina to reduce the falling damage you take by 10 times your level.
- **Feint**
Make contested deception vs a creature's insight. If you succeed you gain advantage on your next attack against them this turn.
- **Spring**
You double your jump distance until the end of your turn.
- **Quick Pick**
You can attempt to either pick a lock or pickpocket a creature. If you choose the latter, you make a contested sleight of hand check vs their perception, on a success you steal a tiny object being carried or potentially worn from that creature. (Dm's discretion).
- **Distract**
You make a contested performance check vs a creature's insight, on a fail they must select you as an attack target on their next turn.
- **Interfere**
A creature you choose gains disadvantage on the next ability check it makes to perform the task you are interfering with, provided that it makes the check before the start of your next turn. Alternatively, you can hinder a creature trying to attack another creature within 5 feet of you.
- **Juggle**
You can change/swap the items in your hands for items in your inventory in one movement.
- **First Aid**
You make a medicine check, administer a healer's kit, antitoxin, or health potion.
- **Lead**
You cause a willing creature you can touch, to move with you on your turn.
- **Mundane “Illusion”**

You harmlessly throw a rock, kick up dust, or imitate a bird call to misdirect another creature. You make a contested sleight of hand or performance vs their perception. If they fail they spend their turn moving towards a point of your choosing, within 20ft of you.

If this is activated in combat, the target makes their check with advantage and you make yours at disadvantage.

- **Signal**

You silently communicate a simple idea to a willing creature that can see you and can understand at least 1 language.

Weapon Master

Cost: 1 LP

When you spend a point in this node, you can choose to gain the benefits of one of the Weapon Master abilities from the list below. Each Weapon Master ability is associated with a particular weapon, and while wielding that weapon, you gain the benefits of any known Weapon Master abilities you have, associated with that weapon. If you know multiple Weapon Master abilities that might all apply to the current weapon you are wielding, you gain the benefits of all of those abilities.

Each ability also has a “Perfected Technique”. These are accessible when you reach level 5 and own this particular Weapon Master ability. These “perfected techniques” typically require stamina to use which will be noted in the ability itself.

- **AXE-TERMINATOR:** *Affects any weapons described as an axe.*

When you make an attack with this weapon you can spend a bonus action to make a backswing with the axe, treating it as an “off-hand” attack.

Perfected Technique (Available at 5th Level):

When you make an attack with this weapon, against a creature, you can spend 2 stamina to have any adjacent creature of your choice, take damage equal to half of the damage dealt. You can spend an additional 2 stamina to choose an additional creature.

- **Big Swinger:** *Affects any weapon with the two-handed property*

When you deal damage with this weapon to a target creature, you can deal additional damage to any one creature adjacent to your target, equal to your strength modifier.

Perfected Technique (Available at 5th Level):

When you use the Big Swinger ability, you may spend 1 stamina point to choose 1 additional adjacent creature, per stamina point spent.

- **Boomeranger:** *Affects weapons with the light and thrown properties*

Whenever you throw any of these weapons, they return to your hand.

Perfected Technique (Available at 5th Level):

When you deal damage with this weapon, you can spend 1 stamina point to pull the target 10ft towards you when your weapon returns to your hand. The next attack made against this target has advantage.

- **Bullseye:** *Affects any weapons described as a dart.*
The roll needed to roll a critical hit with this weapon is lowered by 3.
Perfected Technique (Available at 5th Level):
If you score a critical hit against a creature with this weapon, you can spend 2 stamina points to force that creature to make a constitution saving throw where the DC is equal to half of the damage they took (minimum 10) or be stunned until the end of your next turn.

- **Clubbing:** *Affects any melee weapon that deals bludgeoning damage*
When you deal damage to a creature with this weapon, they have a disadvantage on intelligence checks and saving throws until the end of your next turn.
Perfected Technique (Available at 5th Level):
When you use the clubbing ability, you can spend 2 stamina points to force the creature to make an intelligence saving throw, against your attack roll or become stunned until the start of your next turn.

- **Entangler:** *Affects any weapons or objects that can be used to grapple or restrain (eg. a net)*
When you successfully grapple or restrain a creature with this weapon, they fall prone and cannot make attack rolls that require the use of their hands or cast spells that require material or somatic components, so long as they are grappled or restrained.
Perfected Technique (Available at 5th Level):
When you make an attack with this weapon to restrain or grapple a creature, you can spend 1 or more stamina to target any adjacent creatures to the original target. You can select 1 additional target per stamina spent.

- **Goliath Feller:** *Affects any weapon that is considered to be a sling*
Once per turn, any damage you deal with this weapon to creatures larger than you, is doubled. A creature subjected to this effect cannot be targeted again for another 24 hours.
Perfected Technique (Available at 5th Level):
When you make an attack with this weapon, against a creature larger than you, you can spend 1 stamina to force the creature to make a dexterity saving throw against your attack roll, or fall prone.

- **Gun-Fu:** *Affects any weapons with the reload property*
You can Reload as a Free Action and no longer have disadvantage on attacks with weapons with the reload property at close range.
Perfected Technique (Available at 5th Level):
When you make an attack with this weapon, you can spend 1 stamina to make 1 additional attack with this weapon at disadvantage.

- **Hammer Time:** *Affects anyone weaponed described as a hammer, maul or mace*

When you deal damage with this weapon to a creature, you can attempt a strength check (DC: target's AC). On a success you reduce their AC by 2. This armour reduction lasts until the end of your next turn.

Perfected Technique (Available at 5th Level):

When you deal damage to a creature with this weapon, you can spend 1 stamina to reduce their AC by 2 until the end of your next turn, without making a strength check.

- **Hiker:** *Affects any weapon described as a cane or staff.*

While wielding this weapon you increase your movement speed by 5ft and ignore difficult terrain.

Perfected Technique (Available at 5th Level):

The movement speed granted by this ability is increased to 15ft. Additionally, you can spend 1 stamina to dash as a free action on your turn. You can only use this feature once per turn.

- **Improviser:** *Affects any item or object used as a weapon that is not typically considered a weapon*

You are considered proficient in attacks made with these "weapons". Additionally they deal an additional 1d4 of damage when used.

Perfected Technique (Available at 5th Level):

You can spend 1 stamina to have attacks that you make, deal twice as much damage to constructs and objects, until the end of your turn.

- **Sniper:** *Affects any weapons described as a bow*

You add a +1 to attacks and damage rolls made with this weapon.

Perfected Technique (Available at 5th Level):

When you make an attack with this weapon, you can spend 1 stamina to make 1 additional attack with this weapon at disadvantage. You also no longer have disadvantage on attacks made with this weapon at long range.

- **Living Weapon:** *Affects unarmed attacks*

When you make an unarmed attack as an action, you can spend a bonus action to make two additional off-hand unarmed attacks (These attacks do not add your ability modifier to their damage)

Perfected Technique (Available at 5th Level):

When you use the Living Weapon ability to make additional unarmed attacks, you can spend 1 stamina to make 2 additional offhand unarmed attacks at disadvantage.

(Similarly, due to them being "off-hand attacks" they do not add your ability modifier to their damage)

- **My Little Friend:** *Affects any weapon considered to be a knife or dagger.*

You can spend an action to conceal this weapon, hiding it from sight. If you make an attack with a concealed weapon, it is considered a Sneak Attack, and you deal 1 additional d6 of damage with that weapon. When you do so, the weapon is no longer

concealed. You can have a number of concealed weapons at any one time, equal to your dexterity modifier.

Perfected Technique (Available at 5th Level):

When you make an attack with this weapon, you can spend 1 stamina to make up to 2 additional attacks with any other concealed weapons you might have, but these attacks are made at a disadvantage.

- **Poker:** *Affects any weapons described as polearms*

Whenever you deal damage with this weapon, you push the attacked creature back 5ft.

Perfected Technique (Available at 5th Level):

You can spend 1 stamina point to increase the distance of your Poker ability by 10 additional feet.

- **Protector:** *Affects anyone wielding a shield*

Any allies within 5ft of you gain a +1 bonus to their AC so long as you are not grappled, restrained, stunned or incapacitated.

Perfected Technique (Available at 5th Level):

You can spend your reaction and 1 stamina point to give any one ally within 10ft of you a bonus their AC equal to the AC bonus your shield provides, until the start of your turn, so long as they remain within 10ft of you.

- **Sweeper:** *Affects any weapon described as a polearm.*

If you hit a creature who is beyond 5ft from you, with a melee attack using this weapon, you can force them to make a contested acrobatics or athletics check against you. If they fail, they fall prone.

If you choose to forgo dealing damage with this weapon you can remove “melee” or “beyond” from this ability’s description.

Perfected Technique (Available at 5th Level):

When you make a melee attack with this weapon, you can spend 1 stamina to make a sweeping attack. This sweeping attack targets everyone within a 15ft cone. You make an attack roll and each creature within the cone must make a dexterity saving throw against your attack roll. On a failed save they take half as much damage from your attack. On a successful save, they take no damage.

- **Vanilla Hero:** *Affects any weapons described as a sword*

You add a +1 to attacks and damage rolls made with this weapon.

Perfected Technique (Available at 5th Level):

When you make an attack with this weapon, you can spend 1 stamina increase the range of your attack by 10ft for every point of stamina spent.

- **Whiplash:** *Affects any weapons described as a whip*

When you make an attack with this weapon you can additionally make a grapple check as a free action against the target. This can also be used against small objects to pull them towards you, or to move an additional 15ft horizontally, if you grapple a secured, unmoving object.

Perfected Technique (Available at 5th Level):

When you make an attack with this weapon and successfully grapple a creature, you can spend 1 stamina point to knock that creature prone.

- **Yeeter:** *Affects any weapons with the thrown property, or any throwable items*
Weapons you throw deal twice your ability modifier when calculating damage.

Perfected Technique (Available at 5th Level):

When you throw a weapon, you can spend 1 stamina to triple its range, ignoring any penalties from long ranged attacks.

PERFECT FORM

Cost: 5 LP

Requires: At least 20 LP to have been spent in Technical nodes

When you purchase this node you can select one of the following abilities from the list below. It requires an action to activate a Perfect Form ability, and when you have done so, you cannot activate a Perfect Form ability again, until you finish a long rest. Additionally, you cannot activate a Perfect Form ability if you are missing any hit points.

Note: *All of the Perfect Forms listed below have interchangeable names. Please do not feel obliged to stick with the names listed, nor the flavours they suggest.*

For example, lightning barrage could be you teleporting around the place, literally becoming lightning or even alternate versions of yourself leaping in from different dimensions to beat the crud out of your enemies.

Please make these ultimate techniques your own.

Create Weak Point

In a single, swift strike, you expose an area of weakness on your enemy where all attacks can easily penetrate. You may activate this ability after making a successful attack against a target. When you do so, you may use as many of the following effects below so long as you spend the required amount of stamina to do so. Each ability has a listed amount of stamina needed to perform each effect. You may choose any effect multiple times, but must spend the required amount of stamina each time you do.

These debuffs exist so long as you are not missing any hit points. If you lose hit points and then regain them, these debuffs are not reapplied.

- Reduce the target's AC by 1 for the next 10 minutes. (Costs: 1 stamina) each stamina spent reduces its AC by 1 to a maximum reduction of 5.
- Remove 1 of the target's resistances to a particular damage type or condition for the next minute. (cost: 1 stamina)
- Remove 1 of the target's immunities to a particular damage type or condition, for the next minute. (cost: 2 stamina)
- Remove a legendary resistance from the target. Max 1. (cost 4 stamina)

- Remove one of the target's passive abilities. Eg. Regenerate, Reflective Carapace. This ability lasts for 3 rounds of combat. (cost: 5 stamina)

Deadly strikes

All benefits of this ability last for 1 minute. If you are missing any hit points, you cannot gain the benefits of this ability until they are full again. Whenever you deal sneak attack damage you can add more than one exposing strike to that attack, so long as you have the stamina to do so. All attacks you make, while this ability is active, are made at advantage.

Lightning Barrage

When you activate this ability, you make a number of attacks equal to your proficiency modifier. After each of these attacks, you may teleport up to 60ft before you make the next attack. After this, your movement speed is doubled until you take damage for the first time after activating this ability.

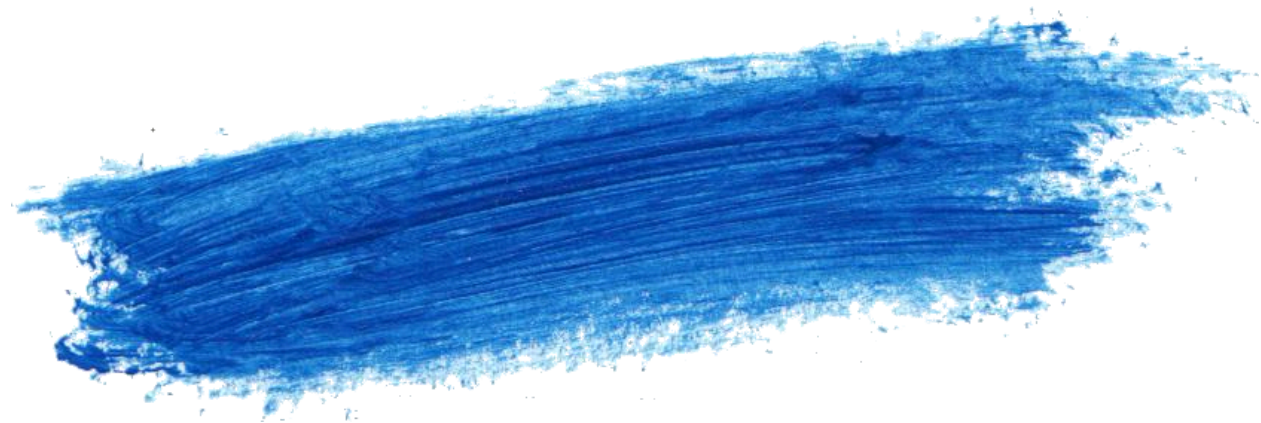

Perfect Strikes

When you activate this ability, you spend a number of stamina points (max 5) to reduce the number you need to score a critical hit for by that amount. This ability lasts for 1 minute, and you gain its benefits so long as you are not missing any hit points.

Ultimate Defence

When you activate this ability your AC increases by 5 and you gain a +5 to all Dexterity saving throws. When you move you do not provoke opportunity attacks and you gain the features of the evasion ability, as if you had it.

This ability lasts for 1 minute, and you gain its benefits so long as you are not missing any hit points.

Blue Nodes: Mystical

Arcane Bond

Cost: 4 LP

You dedicate yourself to a single aspect of the magical world and make it the core focus of your arcane power. When you purchase from this node, you choose an ability from one of the Arcane Bonds from the list below. **Once you have purchased an ability from one of the lists of Arcane Bonds below, you cannot purchase abilities from any other Arcane Bond lists, except from the list you first purchased from.**

So choose wisely!

Each ability in the lists below costs 4 LP to purchase.

Black Mage

You dedicate your heart to the pursuit of power, whatever the cost. You become the master of syphoning of life and the art of sacrifice. All great things gained come with an equal loss.

Black Mage Abilities List:

- **Life Drain:** When you deal damage to a creature with an attack, you regain hit points equal to your proficiency bonus. If an attack you make reduces a creature to 0 hit points, you regain twice as many hit points from this ability. Constructs and undead are unaffected by this ability.
- **Blood Sacrifice:** When you make a spell attack, but before you know the result, you can sacrifice a number of hit points to increase its damage by half of the amount of hit points you sacrificed.
- **Forbidden Magic:** If you choose to cast a necromancy spell, you can do so for half of its mana cost. In exchange you lose hit points equal to that spell's original mana cost.

Blue Mage

You dedicate your mind to the pursuit of perfection. Knowledge is power and will allow you to mould the world to your perfect ideals. You must be careful in your pursuit and be ready to manipulate and deceive the world, if it means guiding it to your vision.

Blue Mage Abilities List:

- **Seeker of Perfection:** When you roll for the damage of a spell you cast, you may reroll each dice rolled once each if you are unhappy with their result.
- **Well of Knowledge:** You may add your intelligence modifier to any saving throw you make.
- **Tactician:** You can use your intelligence instead of your strength or dexterity modifier for melee or range weapons.

Green Mage

You dedicate your life to life; all living things. This world is precious and needs to be nurtured. And the love you give to the world, is returned to you tenfold. Traditions, the ties that bind and the ways of nature must be preserved and defended. You know that true power does not come from one single source alone.

Green Mage Abilities List:

- **Emissary of Life:** Anytime you heal a creature you instead heal them for twice that amount.
- **Ties that Bind:** Any allies within 10ft of you can add your spellcasting ability modifier to their saving throws.
- **The Power of Kinship:** For every tiny or larger ally within 10ft of you that you can see, you add 1 to every saving throw, ability check and attack roll that you make. This bonus can be no higher than your proficiency modifier.

Red Mage

You submit your soul to emotion; let it be your guide. Freedom is the ultimate goal. Let cities crumble with time, let fires rage, you know that true power cannot be contained, only danced with. Listen to that impulse deep within; your instincts will guide you.

Red Mage Abilities List:

- **Let Chaos Reign:** Whenever you make a spell attack roll and are unhappy with the result, you can reroll all of the dice you just rolled but must keep the new results. Additionally, any damage dealt by 1st level spells or higher than you cast, deal twice as much damage to constructs and objects.
- **Unchained:** You may cast the Knock spell for one mana as a bonus action. When you do so, it makes no sound and the target of the spell is destroyed, magical or otherwise, unless the target is sealed with the lock spell, in which case it is simply suppressed for 10 minutes. Additionally you cannot be grappled or restrained and can spend 1 mana as a reaction to end one of these effects on a creature of your choosing.

Finally, you may also spend 2 mana as a reaction to end any magical effect that would prevent a creature of your choosing from moving.

All of these abilities can be used on any targets within 60ft of you that you can see.

- **Freedom:** The following spells can be cast for half as much mana and you learn 2 of them: fly, freedom of movement, expeditious retreat, longstrider, misty step and thunder step. Additionally, whenever you deal damage to a creature using a 1st level spell or higher, you may teleport up to 30ft.

White Mage

You dedicate conscience to doing what is right. Rigorous structure and order is what is needed to grab power by the horns and guide it on the right path; to be used for good. You will follow a selfless path of law and light. The better the world, the greater the forces of good will be.

White Mage Abilities List:

- **Life Transference:** As an action you can touch a willing creature and when you do so, you reduce your hit points by a certain amount and restore that creature's hit points by that same amount
- **Selfless Act and Repent:** If a creature within 10ft of you is targeted by a spell or made the centre of a spell, you can spend your reaction and mana equal to the spell's level to make yourself the target of the spell on you instead, or alternatively silence the caster until the end of their next turn, after the spell is cast.
- **Banishing Light:** Any spells you cast against undead creatures deal additional radiant damage equal to your level. Additionally, undead creatures have disadvantage on saving throws against spells you cast against them.

Void Mage

You give yourself up to the void. You throw it all away now understanding the pointlessness of pursuing power. It does not exist and should not exist. You will rid the world of power. Only then will all things be equal.

Void Mage Abilities List:

- **Anti-Mage:** The following spells can be cast for half as much mana: antimagic field, blindness/deafness, counterspell, dispel magic, faerie fire, see invisibility and silence.
Additionally, you learn the spell counterspell if you do not already know it.
- **Arcane Dilution:** You have advantage on saving throws against all magical effects and are unaffected by 1st level spells and cantrips.
- **Spell Drain:** If you succeed on a saving throw against a spell effect, you regain mana equal to half of the spell's mana cost.

Cantrip

Cost: 1 LP

You learn 2 cantrips of your choice. Simple!

Esper

Cost: 1 LP

Grants you 2 Esper abilities from the list below. Espers are magical flourishes that can be achieved by spending mana. Most are psychic based abilities and do not count as “magical in nature” nor is the use of these abilities considered to be the casting of a spell or cantrip.

- **The Hand:** As an Action you can lift or interact with tiny objects or mechanisms, within 30ft of you no heavier than a kg. You can spend 1 mana to throw any object of this size up to 30ft.
- **Deflect:** As a reaction you can spend 1 or more mana to reduce the damage you would receive from a spell attack by 1d10 for each point of mana spent + your spellcasting modifier. If you reduce the spell's damage to 0 in this way, you can spend 1 additional point of mana to reflect the spell back at the caster. You make a new spell attack with this spell using your own spell attack modifier but the original damage remains the same.
- **Disarm:** You spend 1 mana as bonus action to force a creature to make a strength saving throw against your spell DC. On a failed save, they drop one item they are holding.
- **Mystic Bazaar:** You can expend 3 mana during a short or long rest to enter a trance-like state, in which your consciousness is transported to a space known as The Bazaar. In The Bazaar you are able to exchange money from your character's inventory for mundane items of equivalent value.
DM Note: The Bazaar could take on any form, depending on the character or setting. In one campaign it may look like a simple market town filled with merchants, in another it might look like a chain convenience store from Earth.
This ability was inspired by “The Bad Idea Generator”
- **Pull:** You can spend a bonus action and 2 mana to force a creature within 30ft of you to make a strength saving throw against your spell DC. On a failed save they are pulled up to 15ft towards you.
- **Push:** When you make an attack against a creature you can spend 1 mana to force them to make a strength saving throw against your spell DC. On a failed save, the creature is pushed back 10ft.
- **Slam:** When you make a successful attack against a creature you can spend 3 mana to attempt to slam them to the ground. The attacked creature must make a strength saving throw against your spell DC or be knocked prone. If the creature is larger than you, you must spend 1 additional mana for each size larger than you that they are, in order for this ability to affect them. Creatures larger than you are otherwise unaffected by this ability.
- **Grow:** You can spend 2 mana as a bonus action to increase your size by one stage until the start of your next turn. While this size, your weapon and unarmed attacks deal an additional 1d6 damage but your AC is reduced by 2. You can spend an additional point of mana to maintain this ability at the start of each of your turns.
- **Leap:** Once per turn, you can spend 1 mana to double your jump height and jump distance until the end of your turn.
- **Float:** Before you hit the ground from a height, you can spend 1 mana as a reaction to become immune to falling damage until the end of your turn.

- **Soar:** You can spend 2 mana as a bonus action to gain a flying speed of 30ft until the end of your turn.
- **Peer:** You can spend 1 mana as a bonus action to read the surface thoughts of a creature you can see. If you do this, you gain advantage on insight and deception checks against them until the end of the turn.
- **Steel:** If you are forced to make a saving throw against an effect that would charm you, you can spend 1 mana as a reaction to gain advantage against it.
- **Security:** If a creature would try to read your thoughts, you become alerted to it, but do not know who is reading them. When this happens you can spend 2 mana as a reaction to deal 2d8 psychic damage to them.

Mana

Cost: 1 LP

Grants you 2 mana to add to your mana pool, additionally increasing its maximum size by 2. You can spend mana to cast spells or alter them, as well as using them to create numerous other magical effects and abilities granted to you by different nodes on this skill tree.

See [The Mystical Branch & Spellcasting](#) to learn more on mana, casting spells and more.

**You cannot spend more mana than your level + your spellcasting modifier per turn.
And you cannot upcast a spell higher than 9th level.**

Each time you gain a certain amount of mana, you naturally come to learn a new spell of your choice. See the table below to see the level of spell that you learn, after gaining a sufficient amount of mana in your mana pool. For example, after gaining 10 mana from this node, you learn a level 1 spell of your choice for free. You always have the option too to pick a lower level spell than the one offered.

Optional: Instead of picking a new spell, you may instead choose one of the optional “Arcane Advancements” on the table below, rather than learning a new spell. If there is more than one option available, you may only pick one. However, when picking an Arcane Advancement, you always have the option to choose previous Arcane Advancements instead of the one(s) offered to you in the column related to the level of mana you have just reached.

For example, upon gaining 30 mana, I could pick Specialist or Battle mage, but I could also pick from any of the other options available to me in previous columns, say “Arcane Understanding” for example.

Size of Mana Pool Reached	Level of Spell Learned	Arcane Advancement (Optional)
10	1	Flexible: Learn 2 new Cantrips
15	2	Elemental Affinity: You may choose one damage type of your choice. When you cast a spell of level 1 or higher that deals the selected damage type, you may add your

		spellcasting modifier to the damage roll. Elemental Understanding: You may choose one damage type. Whenever you receive damage from that damage type you may spend your reaction to reduce that damage by an amount equal to your level.
20	3	Weave Wielder: You learn 2 <i>Spell Weaves</i> of your choice. OR Master Summoner: Gain one free purchase from the <i>Summon</i> or <i>Summon Buff</i> node as if you spent LP in it. <i>This does not count towards LP spent in Mystical Nodes.</i>
25	4	Arcane Understanding: Choose a school of magic. Whenever you purchase from the Spell node, you can instead pick 2 spells instead of one. So long as both of those spells are of the same school of magic you chose from this ability. OR Fortified Caster: You add +1 to your spellcasting attack modifier or your spell DC
30	5	Specialist: Choose a school of magic. Spells of this particular school cost 1 less mana to cast. (minimum 1 mana). OR Battle Mage: You may add your spellcasting modifier to concentration checks.
40 & must be level 15 or higher	6	Master Caster: You choose one 1st or second level spell that you know. You may cast this spell at its lowest level without spending mana to do so. OR Mana Surge: Once per day, you can choose a willing creature within 30ft of you that you can see, and as an action grant them 5 temporary mana. This mana does not count towards a creature's maximum spell pool and is treated similarly to temporary hit points. Any unspent temporary mana disappears after 10 minutes
50 & must be level 15 or	7	Signature Spell: You choose two 3rd level

<i>higher</i>		spells or lower that you know. You can cast this spell at 3rd level by spending only 1 mana to do so. OR Dual Mage: You are no longer limited to purchasing abilities from just one mage type from the Arcane Bond node. You may now purchase abilities from a second mage type of your choice.
---------------	--	--

Mana Drain

Cost: 2 LP

When you deal damage with a melee spell attack with a 1st level or higher or deal more than 10 magical damage with a melee attack, you gain mana equal to the amount of times you have purchased from this node.

This damage must be dealt to a living creature. This creature must be somewhat magical in nature, or must be someone or something who is able to cast spells. If this is not the case, you will only ever receive one mana from that creature, once only. Objects are unaffected by this ability, unless the DM deems otherwise.

What is magical?

For reference, an owlbear, cranium rat or other “fantastical beings” would all be considered “magical” in this case. A brown bear, footsoldier, or dinosaur would not be considered magical.

If ever there is confusion at the table as to whether or not a creature is or is not magical, roll a d20. On an 11 or higher it is in fact magical and has a hidden talent for magic or connection to it laying dormant within their being.

You can purchase from this node a maximum number of times than equal to your proficiency modifier.

Spell

Cost: 1-2 LP

You learn 1 spell. However, you may only learn spells of a particular level, if you have the required amount of mana in your mana pool, or more.

See [Learning Spells](#) for more information.

Note: some spells require more than 1LP to purchase (*see their “cost” for more information*)

Any time you cast a spell of 6th level or higher more than once per day, you must make a Constitution Saving Throw (DC: 8 + the spell’s level) or gain a level of exhaustion.

- Level 1 Spell. Requirement: n/a Cost:1
- Level 2 Spell. Requirement: 10 mana Cost:1

- Level 3 Spell. Requirement: 15 mana Cost:1
- Level 4 Spell. Requirement: 20 mana Cost:1
- Level 5 Spell. Requirement: Level 6 or higher, 25 mana Cost:1
- Level 6 Spell. Requirement: Level 10 or higher, 30 mana Cost:1
- Level 7 Spell. Requirement: Level 12 or higher, 35 mana Cost:1
- Level 8 Spell. Requirement: Level 15 or higher, 40 mana Cost:1
- Level 9 Spell. Requirement: Level 16 or higher, 50 mana Cost: 2

Spell Weave

Cost: 1 LP

Grants you 2 Spell Weaves from the list below. Works like a sorcerer's "Metamagic" abilities, Spell Weaves, also referred to as "the weaving of a spell", lets one warp the nature of spells they cast, altering their properties in different ways. To "weave" a spell, you must spend the required amount of mana mentioned in the Spell Weave's ability.

Spell Weaves are used as the spell is being cast but before spell attacks or saving throws are made.

You may only alter a spell so far. When spending mana to alter a spell, using Spell Weave abilities, you can only spend a number of mana doing so, equal to your proficiency modifier.

- **Alter Element**
You can spend 1 mana to alter the damage type of a spell you cast to one of the following: Acid, cold, fire, lightning, necrotic, poison or thunder.
- **Careful Craft**
When you cast a spell that forces other creatures to make a saving throw, you can protect some of those creatures from the spell's full force. To do so, you spend 1 or more mana and choose a number of those creatures equal to the amount of mana spent + the spell's level. A chosen creature automatically succeeds on its saving throw against the spell.
- **Distant Weave**
When you cast a spell that has a range of 5 feet or greater, you can spend 1 mana to double the range of the spell.
When you cast a spell that has a range of touch, you can spend 1 mana to make the range of the spell 30 feet.
- **Empowering Burst**
When you roll damage for a spell, you can spend 1 mana to reroll up to 2 damage die, per mana spent. You must use the new rolls.
- **Fast Cast**
When you cast a spell that has a casting time of 1 action, you can spend 3 mana to change the casting time to 1 bonus action for this casting.
- **Galvanise**
When you cast a spell that forces a creature to make a saving throw to resist its effects, you can spend 3 mana to give one target of the spell disadvantage on its first saving throw made against the spell. You can spend 3 additional mana to give 1 additional creature disadvantage too.

- **Homing Guide**

When you cast a spell that requires you to make a spell attack roll or that forces a target to make a Dexterity saving throw, you can spend 1 mana to ignore the effects of half- and three-quarters cover against targets of the spell.

- **Linger**

When you cast a spell that has a duration of 1 minute or longer, you can spend 1 mana to double its duration, to a maximum duration of 24 hours.

- **Split Spell**

When you cast a spell that targets only one creature and doesn't have a range of self, you can spend a number of mana equal to the amount of mana spent to cast the spell, to target a second creature in range with the same spell (2 mana if the spell is a cantrip). To be eligible, a spell must be incapable of targeting more than one creature at the spell's current level.

For example, magic missile and scorching ray aren't eligible, but ray of frost and chromatic orb are.

- **Subtle Craft**

When you cast a spell, you can spend 2 mana to cast it without any somatic or verbal components.

Summon

Cost: 1 LP

Allows you to summon a familiar from the list below. Each purchase from this node allows you to choose an additional creature from the list below to add to your own list of creatures that you can summon. You may only have one active familiar at any one time. Summoning a new familiar dismisses any previously active familiars.

Note: *If you happen to have learned how to summon "Any 3 small or tiny CR 0 Beast creatures" you may choose to summon all 3 in one go, and all 3 may be active at the same time. However, should you wish to infuse any of these familiars with a "summon buff" you are only able to select one to gain the buff, unless you pay additional mana for each other summon to gain the same buff. For example, let's say I want to summon 3 rats and give them all a "death burst". I can do this, but it will cost me one additional mana for each rat I wish to give it to. If I want each rat to have death burst I will need to spend 3 mana for each rat as well as the 1 mana to summon all 3 in the first place, coming to a total of 4 mana to summon 3 exploding rats.*

You may spend an action to remove any amount of your own senses and replace them with the familiars; being able to see what it sees, hear what it hears etc. In the case of having multiple familiars, you may only tap into one creature's set of senses at a time.

When a familiar drops to 0 hit points it is dismissed and you cannot resummon that familiar again until you take a long rest. So, if all of the familiars you know how to summon drop to 0 hit points, you cannot summon any creatures again until you take a long rest.

To summon a familiar you must spend 1 mana and an action to do so. Additionally, if you want that summon to have any additional buffs when summoned that you might have purchased from

the "Summon Buff" node, then you must additionally pay the respected amount of mana for each of those buffs.

- Any 3 small or tiny CR 0 Beast creatures
- Any 2 medium or smaller CR 0 beast creatures
- Any 2 small or tiny CR 1/8 beast creatures
- Any 1 large or smaller CR 1/8 beast creature
- Any 1 medium or smaller CR 1/4 beast creature
- Any 1 medium or smaller CR 1/8 or lower construct creature.
- 2 cranium rats
- 1 commoner
- 1 flumph
- 1 imp
- 1 lemure
- 1 sprite
- 1 abyssal chicken

Summon Buff

Cost: 1 LP

Whenever you purchase from this node, you gain access to 2 of the summon buffs listed below. When you summon your familiar they gain the benefits of any of the abilities you have purchased from this node. A familiar can only have a number of abilities active, when summoned, equal to your proficiency modifier. When you decide to summon a familiar with one of the buffs you have gained access to, you must also pay the amount of mana listed in the Summon Buff's description, alongside any other mana costs for the summon itself. When spending mana on buffs for your familiar, you cannot spend a total number of mana greater than your level.

- **Wings:** *Cost: 1 Mana*
Your familiar gains a flying speed equal to its movement speed.
- **Elemental:** *Cost: 1 Mana*
The damage your familiar deals is now changed to one of the following damage types: Acid, cold, fire, lightning, poison or thunder.
- **Big Mode:** *Cost: 3 Mana*
Your familiar becomes a large creature and it deals 1 additional damage dice when rolling for damage.
- **Mana Drain:** *Cost: 2 Mana*
When your familiar deals damage, you regain 1 mana.
- **Life Drain:** *Cost: 3 Mana*
When your familiar deals damage it heals you by 1d4 hit points.
- **Extra Attack:** *Cost: 4 Mana*
Your familiar can make 1 additional attack on it's turn
- **Thick Hide/Shell:** *Cost: 2 Mana*
Increase your familiar's AC by 2
- **Incorporeal:** *Cost: 2 Mana*

Your familiar gains resistance to bludgeoning, piercing, and slashing damage from non-magical attacks

- **Death Burst:** *Cost: 1 Mana*
When your familiar dies it deals 1d6 damage to every creature within 5ft of it. You can spend additional mana to increase this damage by 1 additional d6 for each point of mana spent. The damage dealt is bludgeoning damage unless the familiar is under the effects of the "Elemental" buff, in which case it deals that damage type instead.
- **Speedy:** *Cost: 1 Mana*
Increase your familiar's base movement speed by 10 ft. It can also take the dash action as a bonus action.
- **Barbed Hide:** *Cost: 2 Mana*
Any creatures who deal melee damage to this familiar take damage equal to your level.
- **Unstable Summon:** *Cost: 2 Mana*
Your familiar is under the effects of the *Blink* spell until it is dismissed.
- **Shrunk:** *Cost: 1 Mana*
Your familiar's size becomes tiny and deals half as much damage but their AC and dexterity saving throws increase by 5.
- **Well Fed:** *Cost: 1 Mana*
Your familiar's hit points increase by 20 for every mana spent on this ability when summoning it.
- **Cannon Fodder:** *Cost: 0 Mana*
Your familiar has 1 hit point and this number cannot increase. When you summon a familiar in this way, you gain 2 mana which can only be spent on Summon Buffs for this summoned familiar.

Ward

Cost: 1 LP

Each purchase of this node grants you one use of the Ward ability per short rest. As a reaction whenever a creature that you can see within range (which can include yourself), would be attacked you can spend mana to increase that creature's AC by twice the amount of mana spent, until the start of their next turn.

The mana you spend on this ability can be no higher than the amount of LP invested in this node

The range of your ward increases by 10ft for each LP spent in this node.

Wards prevent any damage dealt to a creature from the magic missile spell.

You can purchase from this node a number of times equal to your proficiency, and each purchase grants you an additional use of it per short rest.

MYSTIC ART

Cost: 5 LP

Requires: At least 20 LP to have been spent in Mystical nodes

When you purchase this node you can select one of the following abilities from the list below. It requires an action to activate a Mystic Art ability, and when you have done so, you cannot activate a Mystic Art ability again, until you finish a long rest. When you use a Mystic Art, you automatically use up all of your remaining mana in order to do so, bringing your mana pool to 0. The amount of mana used up this way will determine the effects of the Mystic Art used.

Mystica Arts are considered magical in nature but are not considered to be the casting of a spell (unless specified). All Mystic Arts or spells cast by Mystic Arts, are unaffected by the effects of counterspell.

Note: *All of the Mystic Arts listed below have interchangeable names. Please do not feel obliged to stick with the names listed, nor the flavours they suggest.*

For example, the art of shadow suggests that you forge the ultimate summon from the shadows, like a shadow puppet. But feel free to label it "Mystic Art of Perfection" or "Shaping" for a broader term. Or perhaps something along the lines of "Prismatic Mystic Art" suits your character far more, who creates fractal-like creatures who resemble beings made of shattered glass or mirror.

Please make these ultimate techniques your own.

Mystic Art: Shadow

When you activate this ability, you summon one familiar from the list of familiars available in the "Summon" node. It has a total amount of hit points equal to 5 times the amount of mana spent on this ability. It shares the same mental abilities as you (Int, Wis & Cha) but its physical stats remain the same (Str, Dex, Con). However, when you summon this familiar, you may choose either its Dexterity Score or Strength Score to become equal to half the amount of mana you spent on this ability.

Your familiar's AC increases by 1 for every 5 mana spent on this ability + your proficiency modifier.

For every 10 mana you spend on this ability, increase the size of your familiar by 1.

Your familiar follows all other rules of a typical familiar. However, should it remain summoned after 1 hour, its summoner takes 1 level of exhaustion, and continues to take an additional level of exhaustion for each additional hour that this familiar remains summoned. A creature who dies from exhaustion in this way cannot be revived and instead turns into a tiny gemstone that contains the "Find Familiar" spell.

Additionally, this summoned familiar gains the following abilities listed below, based on how much mana was spent on this ability. (See Below).

Abilities gained by your familiar from the list below, include all additional abilities above them that required less mana:

- **10 mana:** This summon gains the extra attack feature, allowing it to make 1 additional attack per turn. Additionally it gains your choice of either a Slam, Slash or Stab ability. Each deal 1d10 + its Strength or Dexterity Modifier + your Proficiency Bonus damage.

The damage type is either Bludgeoning, Slashing or Piercing damage respectfully, and is considered magical.

For every additional 10 points of mana spent in this Mystic Art, increase this damage by 1d10.

- **20 mana:** Your familiar's movement speed is doubled and it can teleport a distance equal to its movement speed as a bonus action. When it does so it can carry 1 additional willing and adjacent creature with it.
- **30 mana:** This familiar is now considered a mount and can carry up to 2 medium or smaller willing creatures. Your familiar also gains 1 additional attack per turn. Additionally, you may choose a damage type from the list below, and have your familiar become immune to that damage type:

Acid, Cold, Fire, Lightning, Necrotic, Poison or Thunder.

At any time, should you choose, you can change any of the damage dealt by your familiar, to this damage type instead.

Lastly, whenever your familiar is dealt damage by a melee attack, the attacker takes 5 damage of this familiar's associated damage type.

- **40 mana:** The range of this creature's melee attack increases by 10ft and it now deals double damage to objects and constructs. Alongside this it can carry up to 2 additional adjacent creatures with it when it uses its teleportation ability. Lastly, it can now carry up to 6 medium or smaller willing creatures.
- **50 mana:** This creature can now move through other creature's spaces as well as any material no thicker than 1 ft, or objects/constructs that are huge or smaller. When this familiar does so, the creature(s), material, object or construct must make a Dexterity Saving throw against your spell DC or take 3d10 bludgeoning damage. A creature, material, object or construct forced to make a dexterity save in this way, cannot be made to do so again until the start of the familiar's next turn. Lastly, this familiar can now carry up to 10 medium or smaller willing creatures.

Mystic Art: Life

All creatures of your choosing, within a 30ft radius of you regain hit points equal to twice the amount of mana you used up when activating this mystic art.

This ability grants additional effects based on how much mana was spent to use it. See additional effects below.

Effects listed below include all additional effects above them that required less mana:

- **10 mana:** Any creatures of your choice, within this ability's healing aura, gain an additional 10ft of movement speed until the end of your next turn.
- **20 mana:** Any creatures of your choice, within this ability's healing aura, who are suffering one or more negative conditions, may end one of those conditions
- **30 mana:** Any creatures of your choice, within this ability's healing aura, who are cursed, may end one curse affecting them.
- **40 mana:** Any creatures of your choice, within this ability's healing aura who have lost limbs or who have suffered any other physical traumas within the last minute, are restored to their original state; missing limbs regenerate, scarred tissue is healed etc.

- **50 mana:** Any creatures of your choosing within this ability's healing radius who have died within the last minute, return to life with 10 hit points, and 1 level of exhaustion.

Mystic Art: Light

When you activate this ability, all creatures of your choosing, within a 30ft radius, gain your "Blessing" for the next hour. Any creatures with this Blessing gain a +1 to all attack rolls, saving throws and ability checks for each other creature within 5ft of them who also has your Blessing. *Creatures with your Blessing gain additional benefits, based on how much mana was spent to use this ability. See additional effects below.*

Effects listed below include all previous effects above them that required less mana:

- **10 mana:** If a creature has your Blessing, they gain an additional 10ft of movement speed for each additional creature adjacent to them, with this blessing at the start of their turn.
- **20 mana:** If a creature with your Blessing deals damage, they deal an additional 1d4 radiant damage for each creature adjacent to them with your blessing.
- **30 mana:** Any creature with your Blessing can spend their bonus action to teleport up to 30ft towards another creature with your Blessing.
- **40 mana:** If a creature with your blessing is attacked, any creatures adjacent to them can spend their reaction to increase that creature's AC by 2.
- **50 mana:** Once per turn, a creature with your Blessing may reroll one dice roll they dislike, but must use the new result.

Mystic Art: Nul

You create a permanent area of dead magic within a Xft radius around you, where X is equal to the amount of mana you used up when activating this ability. You may also use this ability as a reaction instead of an action. Doing so can counter any spell being cast at that moment. *This ability grants additional effects based on how much mana was spent to use it. See additional effects below.*

Effects listed below include all additional effects above them that required less mana:

- **10 mana:** One creature of your choice along with any magical items within their possession are unaffected by this area of dead magic.
- **20 mana:** One additional creature of your choice along with any magical items within their possession are unaffected by this area of dead magic.
- **30 mana:** One additional creature of your choice along with any magical items within their possession are unaffected by this area of dead magic.
- **40 mana:** One magical item within this ability's radius turns to ash and permanently loses all of its magical abilities.
- **50 mana:** All magical items within this ability's radius are instantly destroyed. Any items held by creatures chosen to be unaffected by this area of dead magic, are also unaffected.

Mystic Art: Blood

When you activate this ability, all other creatures of your choosing within 30ft of you must make a constitution saving throw against your spell DC. On a failed saving throw, they take necrotic damage equal to the amount of mana you spent when activating this ability. You or one creature of your choice, then regains hit points equal to the amount of mana you spent when activating this ability. Additionally, any creatures who failed their saving throw against this ability, gain any of the following negative abilities listed below based on how much mana was spent on this ability. (See Below).

Effects listed below include all additional effects above them that required less mana:

- **10 mana:** Creatures that failed their constitution saving throw, subtract 1d4 from all saving throws, ability checks and attack rolls they make, for the next hour.
- **20 mana:** Creatures that failed their constitution saving throw, have their movement speed reduced by 10ft, for the next hour and cannot use reactions.
- **30 mana:** Creatures that failed their constitution saving throw, receive an additional 2d10 necrotic damage whenever they are hit with an attack, for the next minute.
- **40 mana:** Creatures that failed their constitution saving throw are cursed for the next minute. All creatures cursed in this way have disadvantage on all attack rolls.
- **50 mana:** Creatures that failed their constitution saving throw cannot regain hit points until they take a long rest. Additionally, whenever that creature is dealt necrotic damage, you or an ally of your choosing, within 10ft of the creature, regains hit points equal to the amount of necrotic damage taken, so long as that creature is cursed by this ability.

Pink Nodes: Physical + Mystical

Avenger

Cost: 1 LP

There is one thing in this world you can't stand, and that is seeing innocent people get hurt. You will be their avenger.

Whenever a creature you can see harms an ally or innocent creature, you can spend your reaction to subject that attacker to your avenger ability. The more crimes a creature, subjected to your avenger ability, commits, the stronger your vengeance becomes.

Whenever you deal damage to a creature subjected to your avenger ability, you deal additional 1 point of damage to that creature. Any time that creature harms an ally or innocence while still subject to this ability, this damage increases by 1. If a round of combat goes by where they haven't dealt damage to an ally or innocent creature, this damage is reduced by 1. When this additional Avenging Damage is reduced to 0, the target is no longer subjected to your avenger ability.

You may only have one creature affected by your avenger ability at a time. You cannot change your avenger ability to another creature until the current creature affected by it is either reduced to zero hit points, incapacitated in some way or until your Avenging Damage is reduced to zero.

For each point invested in this node, your Avenging Damage increases by 1 additional point of damage any time a creature subjected to it harms an ally or innocent creature. Additionally its starting damage bonus is also increased by 1.

You can purchase from this node, a number of times equal to your proficiency.

Focus

Cost: 1 LP

Similarly to the Adrenaline node, this grants you a maximum Focus score equal to the amount of LP invested.

As a bonus action you can begin to Focus. Doing so requires concentration.

When you first begin to Focus, and at the start of each of your turns, so long as you are still Focusing, you increase your Focus score by 1.

Should you lose Concentration on your Focus, your Focus score is reduced to 0.

Any damage you receive is reduced by your current Focus score.

You can also spend Focus as if it were mana but cannot use it to cast spells or summons

While out of combat, Focus works differently. You must concentrate for 1 minute to gather focus, doing so will gather enough to use one ability with a mana cost equal to or less than your maximum focus

At 5th level the amount your Focus Score increases while maintaining concentration increases to 2.

At 9th you can spend Focus to cast 1st or 2nd level Illusion or Transmutation spells.

At 13th level this amount increases to 3.

The amount of LP invested in this node cannot exceed your level.

Fortify

Cost: 1 LP

When you purchase from this node you can choose one of the damage types below. So long as you have 2 or more Focus, you have resistance to that type of damage.

Damage Types

- Slashing, Piercing & Bludgeoning (Non-Magical)
- Acid & Poison
- Fire & Cold
- Thunder & Lightning
- Necrotic
- Psychic
- Radiant

Heal

Cost: 1 LP

You can only have a number of LPs invested in this node, equal to your level.

All healing spells you cast heal 1 additional hit point for every LP spent in this node. This is known as your Healing Modifier.

May also select 2 “Healing Gift” and/or “Support Spells” from the options below each time you invest in this node.

Any “Support Spells” learnt this way are also added to your list of known spells.

When selecting spells, you may only choose spells with a level less than the LP invested in this node.

Using a “Healing Gift” or “Support Spell” requires you to spend a hit dice of your own or from a willing creature you are targeting with one of these features or spells.

The amount of hit dice needed to be spent varies and can be found in the description of each “Healing Gift” and on the “Support Spells” table.

You may only have a creature spend a number of hit dice per turn equal to half the number of LP invested in this node (rounded up).

Healing Gifts

- **Healing Hands:** As an action, you touch a creature to have them spend 1 or more of their hit dice, roll it and have them gain a number of hit points equal to the result + your healing modifier + their constitution modifier (minimum 0).
- **Rejuvenating Touch:** As an action, you touch a creature to have them spend 1 of their hit dice in order to remove a simple condition from them. (charm, poison, frightened, stunned).
- **Miracle Worker:** As an action, you touch a creature to have them spend 2 of their hit dice in order to remove a complex condition from them. (Blind, Deaf, Petrified, Polymorphed, Paralysed).
- **Soothing Words:** As a bonus action, you can choose 1 or more creatures you see and who can see and hear you, and spend 1 of your hit dice per person chosen creature and grant them a number of temporary hit points equal to the result rolled + your Healing Bonus. These temporary hit points last for 1 hour.

Support Spells

Support Spells require an alchemy, medical kit or holy symbol to cast.

Support Spells have a “Hit Dice Cost”.

This is the number of hit dice that must be spent to cast this ability. If the spell targets an ally or multiple allies, the targets of the spell must spend their hit dice to receive its benefits.

If the spell targets a non willing creature or has no target, then the caster must spend their own hit dice in order to cast the spell.

However, these spells still need any required spell components with a gold value in order to cast.

Spells cast with these abilities cannot be countered with counterspells or dismissed with dispel magic.

And should the DM allow, can be considered “non-magical” effects.

Any “Support Spell” learned is added to your list of known spells and so can be cast with mana. Additionally, **any** “Support Spell” can be cast with Focus.

Hit Dice cost	List of Available Spells
1	Protection from Good and Evil, Bless, Heroism, Purify Food and Drink, Sleep.
2	Aid, Blindness/Deafness, Calm Emotions, Gentle Repose.
3	Catnap, Daylight, Feign Death, Haste, Life Transference, Revivify, Slow, Vampiric Touch.
4	Blight, Death Ward, Locate Creature, Polymorph
5	Antilife Shell, Awaken, Cloudkill, Contagion, Dawn, Dream, Greater Restoration, Raise Dead, Reincarnate.
6	Flesh to Stone, Harm, Heal, Sunbeam, True Seeing, Wind Walk.

Outburst

Cost: 1 LP

You choose to unleash a flurry of emotion infused with magic on the creatures around you.

As an action, you can spend 2 mana or 1 adrenaline to choose one of the relevant emotions below. Every creature within a 10ft radius around you must then make a Wisdom Saving Throw against your Spellcasting DC or suffer the effects of that unleashed emotion.

Conditions inflicted this way last for 1 minute or until a creature spends their Action to end it.

You can use this ability a number times per day equal to twice the amount of times you’ve purchased this node. And for each additional purchase of this node, increase the radius of this ability by 10ft.

- **Fury:** inflict the [Burning](#) condition
- **Calm:** inflict the [Chilled](#) condition

- **Strain:** inflict the [Migraine](#) condition
- **Venom:** inflict the Poisoned condition
- **Spite:** inflict the [Blighted](#) condition
- **Burdened:** push all creatures away from you by 10ft
- **Hope:** all creatures gain 5 temporary hit points, for 1 hour.
- **Joy:** All creatures' movement speed increases by 5ft for 1 minute.
- **Resolute:** inflict the Frightened condition.
- **Overwhelmed:** inflict the [Jolted](#) condition.

Protect

Cost: 1 LP

If a creature within 10ft of you takes damage, you can choose to reduce that damage by a number equal to the number of LP invested in this node. If you choose to do so, you take damage equal to the amount you reduced the damage by, divided by 2 (rounded down). For every 5 LP invested in this node, you increase its range by an additional 5ft and the number of targets you can select with this ability per damage source. (For example: you typically can only protect up to 1 creature with a *fireball*'s radius. But if 5 points are invested in this node, you could now protect 2).

Smite

Cost: 1 LP

You gain 2 uses of the smite ability, per day, for every LP invested into this node. When you hit a creature with an attack but before you deal damage, you can expend one use of your smite ability, to add additional damage to that attack's damage. You can choose for this additional damage to be fire, radiant or necrotic.

The additional damage dealt is based on how much mana or adrenaline you are willing to spend. **See the table below for more information.**

Spending 1 mana/adrenaline will add 1d6 + (the amount of mana/adrenaline spent on this smite) of additional smite damage.

To add 1 additional d6 of damage you must spend additional 2 mana/adrenaline per additional dice, to a maximum of 5d6 per smite.

For example: adding 1d6 of smite damage costs 1 mana. Adding one additional d6 of smite damage costs 2 more mana (in addition to the 1 previously spent), and to add a 3rd d6 of damage you must spend an additional 2 mana again, bringing it to a total of 5 mana to add 3d6 + 5 of smite damage.

You can only add a number of additional d6s equal to your proficiency bonus.

Attacks that use Smite cannot regain Adrenaline.

Smite Reference Table

Total	Total Smite Damage Added
-------	--------------------------

Mana/Adrenaline Spent	
1	1d6 + 1
3	2d6 + 3
5	3d6 + 5
7	4d6 + 7
9	5d6 + 9

Teal Nodes: Mystical + Technical

Arcane Strikes

Cost: 2 LP

When you purchase from this node, choose a weapon tag/trait (versatile, light, two handed) or you can choose unarmed attacks. When you deal damage with a weapon with that tag, or an unarmed attack, (if you choose this option) it is considered to be magical in nature. Whenever you deal damage with it, you can spend 1 mana to have that attack deal an additional dice of weapon damage.

Additionally

Whenever you purchase from this node

You can choose 2 Conditions from the list below.

Whenever you deal damage with a melee, ranged or unarmed attack, you can choose to spend 1 mana to force that creature to make a Constitution Saving Throw against your Spellcasting DC.

On a fail, they become afflicted with one of your Arcane Strike Conditions for 1 minute. A creature can repeat this saving throw at the start of each of their turns to end the condition

Blighted: You cannot recover Hit Points

Burning: Take 1d4 Fire Damage at the start of your turn.

You must instead spend an Action to end this condition.

Chilled: You cannot move more than half your movement speed per round.

Eroded: Your AC is reduced by 2.

Jolted: You cannot take reactions and drop 1 item you were holding at the start of each of your turns.

Migraine: You cannot Concentrate.

Poisoned: You have Disadvantage on Attack Rolls and Ability Checks

Winded: You cannot speak or spend Stamina.

Bound Armoury

Cost: 1 LP

As an action, you can magically bind a weapon, piece of armour or shield to you. You may have a number of bound items equal to twice the amount of LP invested in this node. When an item is bound to you, you can choose to summon it to your hand or equip it from any location it exists as a free action. Alternatively, you may dismiss it to your own personal pocket dimension as a free action. Any items bound by you can be stored here. While wielding a weapon bound this way, it cannot be disarmed from you, and armour or shield cannot be forcefully removed by another, unless you wish it. Any ranged weapons bound to you in this way never need ammunition, but instead are loaded with a magical piece of ammunition when used. However, weapons with the reload property still need to be uploaded when necessary. Bound weapons may still use other forms of ammunition too and do not always need to use this magical ammunition. Any arcane ammunition fired from bound weapons disappears after 1 minute, or after the weapon that fired it is dismissed.

Jutsu

Cost: 1 LP

Jutsus are simple magical techniques focused on illusion and trickery, ideal for manipulating the encounters in your favour. When you purchase from this node, you may choose 2 jutsu to add to your collection. Each jutsu typically costs 1 mana and 1 stamina to perform.

Substitution

When a creature makes an attack against you, you can spend 1 mana and 1 stamina as a reaction to increase your AC by 4. If the attack misses you, it instead hits a random item from your inventory that you leave behind and you appear in a different location of your choosing that you can see within 10ft of where you were attacked.

Shadow Step

You can spend 1 stamina and 1 mana to teleport to a place you can see within 30ft of you that is in dim light or darkness. You can spend your reaction to do this whenever a creature moves closer to you or as a bonus action.

Waterstrider

You can spend 1 mana and 1 stamina to give yourself the ability to walk on water for 1 minute. You can do this as a reaction whenever you touch a body of water or as a bonus action. You cannot use this ability while submerged in water.

Wallrider

You can spend 1 mana and 1 stamina as part of a movement action to give yourself the ability to move along vertical surfaces for 1 minute. Whenever you fall you can spend your reaction to use this ability to cling to a surface within 5ft of you or as a bonus action.

Vanish

As a bonus action or reaction to someone looking for you, you spend 1 mana and 1 stamina to gain the benefits of the *pass without a trace* spell. This is not considered to be a spell.

Smokebomb

As a bonus action or reaction to a creature approaching you or an ally, you spend 1 mana and 1 stamina to cast *fog cloud* but it is not considered a magical effect.

Oilspill

As a bonus action or reaction to seeing a creature move, you spend 1 mana and 1 stamina to cast *grease*, but it is not considered a magical effect.

Infiltrate

As a bonus action, you can spend 1 mana and 1 stamina to change your appearance for 1 hour. Your voice and physical appearance resemble a humanoid you have seen within the last 24 hours. If you make an attack or cast a spell the disguise disappears.

Shadow Clone

As a bonus action, you can spend 1 mana and 1 stamina to create an illusory duplicate of yourself up to 10ft away in a space you can see. When you do so, you can choose to immediately swap places with the duplicate so they are where you are and you are where the duplicate appeared.

When you do this your clone always takes its turn after you.

The duplicate shares the same AC as you but only has 1 hit point. It shares your speed, ability scores, proficiencies and saving throws, but it cannot cast spells or make attacks. It can, however, make a non-spell attack if you forgo your action on your turn to attack through your duplicate but it can only ever deal 1 point of damage, whenever it deals damage.

Any Stamina or Mana your clones use, come from your own Mana & Stamina Pools.

Abilities Shadow Clones cannot use are: Adrenaline and Adrenaline based abilities, Limit Break, Perfect Form & Mystic Arts and their shape cannot be changed in any way.

Otherwise you may only have a number of duplicates active at any one time equal to your proficiency bonus and having any duplicates active requires concentration. Should you lose concentration, all duplicates are dispelled.

Mimicry

As a bonus action or reaction (when you hear a sound or see a mannerism or gesture) , you can spend 1 mana and 1 stamina to mimic a sound, mannerism, or gesture that you've experienced. Alternatively you can spend 1 hour to mimic an individual's handwriting, a piece of art or short musical performance, so long as you have it with you as a reference, and also have the correct tools needed to complete such a task. When you do this, you cannot use this ability again until the end of a long rest. After doing so, you will not be able to recreate the same effects again, without said reference and without the time to do so.

Trap

As a bonus action, you can spend 1 mana and 1 stamina to lay a hidden trap on a 5x5ft space adjacent to you. When you do you make a stealth check, this trap cannot be seen and no one noticed you laying it if they have a passive perception is lower than the rolled stealth check. A creature who steps on this trap destroys it but has their movement speed reduced to 0. You may only have one active trap at any one time, and a laid trap is automatically destroyed after 1 hour

Illusion

As a bonus action or reaction to someone looking at an object in your possession, you can spend 1 mana and 1 to have the object appear as something else of a similar size. This illusion lasts for 1 minute or until someone else touches the object. You may only have one of these illusions active at one time. A creature can make a contested investigation check vs your deception to see past the illusion.

Mana Blade

Cost: 1 LP

You spend 1 mana to magically summon a melee weapon made of pure magical energy into your hand. This weapon can take the form of any simple or martial weapon you desire. This weapon can also be any bound weapon in your possession. Any bound weapons summoned this way gain the same properties as any other mana blade summoned in this way in addition to any properties they may have already had. Additionally, you may pay 1 additional mana when you summon a bound weapon in this way to change its shape so it takes on the appearance and properties of any simple or martial melee weapon.

Any damage dealt by a mana weapon is considered to be magical. When making attack rolls and calculating damage with a mana weapon, you may choose to use a mental ability modifier (Intelligence, Wisdom or Charisma) instead of Strength or Dexterity.

This weapon lasts for a number of minutes equal to the amount LP invested in this node, or until dismissed.

- If you invest **3 or more LP** into this node, any mana weapons you summon can also take on the appearance of a simple ranged weapon.
- If you invest **5 or more LP** in this node, all mana weapons you summon are considered to be +1 magical weapons (adding a +1 to attack rolls you make with them and dealing an additional +1 damage).
- If you invest **6 or more LP** into this node, all mana weapons you summon can also take on the form of a martial ranged weapon.
- If you invest **10 or more LP** into this node, all mana weapons you summon can also take on the form of any non magical weapon you desire and are considered to be +2 magical weapons.

Primal Strike

Cost: 1 LP

When you purchase from this node, you may choose 3 damage types from the “Common Strikes” below, or 1 damage type from the “Expert Strikes” list below. Any chosen damage types are added to a list of known strikes.

If you have purchased from this node, you have the ability to spend a bonus action and 1 mana to change any damage type made by a weapon you have, to any of the damage types from your “Strikes Known” list.

The effects of this ability last until you sheath that weapon, change its damage type to a different damage type, stop wielding your weapon for longer than 10 seconds, or fall unconscious.

Common Strikes

- Fire
- Cold
- Lighting
- Thunder
- Acid
- Poison

Expert Strikes

- *Psychic. Additionally if you deal damage with this Strike to a creature with 20 or more Intelligence, you deal additional Psychic damage equal to your level.*
- *Radiant. Additionally if you deal damage to undead or fiend creatures, with this Strike, you deal additional Radiant damage equal to your level.*
- *Necrotic. Additionally if you deal damage to a plant or celestial creatures, with this Strike, you deal additional Necrotic damage equal to your level.*
- Force.

Shape Change

Cost: 1 LP

When you purchase from this node, you choose 1 beast type creature of CR 1/4 or lower, and add it to your list of "Shape Changes". As an action, by spending 1 stamina and 2 mana you can transform into any creature listed in your "shape changes" list. This transformation lasts for 10 minutes.

While you are transformed, the following rules apply:

- Your game statistics are replaced by the statistics of the creature you changed into, but you retain your personality, and Intelligence, Wisdom, and Charisma scores. You also retain all of your skill and saving throw proficiencies, in addition to gaining those of the creature. If the creature has the same proficiency as you and the bonus in its stat block is higher than yours, use the creature's bonus instead of yours. If the creature has any legendary or lair actions, you can't use them.
- When you transform, you assume the creature's hit points and Hit Dice. When you revert to your normal form, you return to the number of hit points you had before you transformed. However, if you revert as a result of dropping to 0 hit points, any excess damage carries over to your normal form. For example, if you take 10 damage in animal form and have only 1 hit point left, you revert and take 9 damage. As long as the excess damage doesn't reduce your normal form to 0 hit points, you aren't knocked unconscious.
- You retain the benefit of any features from your class, race, or other source and can use them if the new form is physically capable of doing so. However, you can't use any of your special senses, such as darkvision, unless your new form also has that sense.
- You choose whether your equipment falls to the ground in your space, merges into your new form, or is worn by it.

When you have invested 2 LP or more into this node, you have the option to add up to 2 humanoids you have seen to your "shape change" list, instead of choosing a beast. However, when you shapechange into this humanoid, you retain all of your statistics and do not gain any of the creature's that you turned into. Only your physical appearance changes as does your voice to resemble them.

When you have invested 3 LP into this node, you can now choose from CR ½ beasts to shape change into.

When you have invested 5 or more LP into this node, you can now shape change as a bonus action instead of spending an action to do so. Additionally you can now choose beasts to shape change into that are equal to half of your level.

When you have invested 6 or more LP into this node, the shape change ability now costs 1 less mana.

When you have invested 7 or more LP into this node, you can now select 3 beasts to shape change into instead of 1, when spending LP in this node.

When you have invested 10 or more LP into this node, you can now choose from elementals as well as beasts to shape change into.

Spellbroken

Cost: 2 LP

When you purchase from this node, some arcane spark ignites within you. Mana that flowed through you, now becomes one with your body, and you hunger for more. The power of this node gets stronger each time you purchase from it.

- **1st purchase (Spelleater):** Whenever you are targeted by or subjected to a harmful spell, you can make a Constitution Saving Throw as a reaction (DC: 10 + the spell's level - number of purchases from this node). If you succeed, you gain mana equal to the spell's level.
- **2nd purchase:** You gain advantage on saving throws against magical effects.
- **3rd purchase:** When you use your Spelleater feature you can choose to spend 2 mana to negate the spell's effects, as if you cast counterspell, at 1st level. (Using your constitution as your spellcasting ability). However, you are unable to use this ability if the spell's level exceeds your mana pool maximum.
- **4th purchase:** Any time you counter a spell successfully, or do so with the ability above, you regain mana equal to the spell's level. Additionally, you can add that countered spell to the list of spells you know.
- **5th purchase (Spellbroken Form):** If ever you regain mana from a spellbroken ability, and you are not missing any mana, or the amount of mana gained would bring you to a total higher than your maximum mana score, you change into a "Spellbroken Form". You may choose to transform into either a beast, crystal or soul form. When this happens, your spellcasting ability score becomes 5 and you can no longer concentrate on spells while in this form. However, you can still cast spells. Your Spellbroken form lasts for 1 minute, and when it ends you gain 1 level of exhaustion, and the amount of mana you have left in your mana pool is halved.

Once you transform into a "Spellbroken Form" for the first time, you will only be able to transform into the form you first picked (beast, crystal, soul), from now on. So choose wisely.

Beast Form

Your body begins to swell under the ever building pressure of magical force that whirlpools inside of you. Every fibre of muscle in your body fills with arcane energy causing your body to grow to twice its size. This magical energy can also cause a whole series of strange mutations from sprouting horns, scales or claws to your hair growing out or falling out entirely. As your mind becomes clouded your body becomes that of a beast.

Your strength score increases by 5 (to a maximum of 25).

Additionally, while in this form you get advantage on all Strength based saving throws and ability checks. You also take half damage from all non-magical bludgeoning, piercing, and slashing damage. You also count as one size larger and can carry twice your carrying capacity.

Lastly, whenever you make an melee attack as an action, you can make 1 additional melee attack, and your unarmed attacks deal an additional 1d8 of one of the following damage types:

- Fire
- Cold
- Lighting

- Thunder
- Acid
- Poison

Crystal Form

Unable to contain the arcane energy within you it bursts from your body and begins to crystallise, turning your flesh, bone and mind into solid crystal. The transmutation of the body to gemstone leaves you in a sorry state when the transformation eventually ends. However, during this transformation you have never felt so invincible. However even after returning to your original form your body still left partly changed. Fragments of crystal still remain inside and out of your flesh and bone leaving you with small remnants of the power you once possessed.

Whenever you transform into your crystal form, increase your AC by 5. Additionally, while in this form you get advantage on all Constitution based saving throws and ability checks. You also take half damage from all non-magical piercing, and slashing damage. You also gain a vulnerability to thunder damage but become resistant to psychic damage.

From now on, whenever you are not in your spellbroken form, your natural AC increases by 1.

Soul Form

The magical force within you begins to fuse with your very soul and begins to shed your physical body like an unwanted chrysalis. While in this spiritual form made of pure arcane energy, the very air around you begins to swirl, with you at its centre. You now exist in three places at once; the material plane, the ethereal realm and within the very weave of magic itself. Upon returning to your original form, the arcane energy around you tries to piece back together and regenerate the body that once was, leaving you born anew after every transformation.

Whenever you transform into your soul form, increase your Dexterity score by 5 (to a maximum of 25). Additionally, while in this form you get advantage on all Dexterity based saving throws and ability checks. You weigh no more than a single pound. You also take half damage from all non-magical bludgeoning, piercing, and slashing damage.

During your turn, while in your soul form, you can use your movement action to teleport to any space you can see, up to your speed. When you do this you enter into, and move through, the ethereal plane before reappearing in the space you chose to “teleport” to. To anyone without the ability to see into the ethereal plane, it looks like you teleported.

Yellow Nodes: Technical + Physical

Combat Focus

Cost: 1 LP

When you purchase from this node, you select a combat focus from the list below. You may only have one combat focus active at any one time. During a long rest, or any time you level up, you may swap out your current combat focus for another combat focus that you know.

- **Archery:** You add +2 to all attack rolls made with ranged weapons

- **Blind Fighting:** You have 10ft of blindsight.
- **Defence:** While wearing armour you have a +1 bonus to your AC. If wearing a shield, you can also add your shield's AC bonus to all dexterity saving throws you make against harmful effects.
- **Duelist:** While wielding a melee weapon in one hand and wielding no other weapons, when you are attacked, you can choose to parry the attack as a reaction, increasing your AC by 2, until the end of that turn.
- **Great Weapon Fighting:** When you roll a 1 or a 2 on a damage die with an attack you made with a melee weapon that you are wielding with 2 hands, you can reroll the die but you must use the new roll you get.
- **Guardian:** While wearing a shield, if a creature makes an attack that you can see, against a target within 5ft of you, or if you are within 5ft of the attack's trajectory, you can spend your reaction to reduce the damage by 1d8 + your shield's armour bonus + your proficiency.
- **Throwing Style:** Drawing and throwing a weapon can all be done in the same attack action. When you make an attack with a thrown weapon, that weapon deals +2 additional damage. Additionally, you can throw all weapons that do not have the heavy property, up to a number of feet equal to 10 times your strength modifier. Attacks made by throwing weapons that do not have the thrown property, are made at disadvantage.
- **Two-Weapon Style:** You ignore the need for weapons that require the light property, in order to engage in two-weapon fighting. Additionally, when you engage in two weapon fighting, you can add your ability modifier to the damage of the second attack. Lastly, if ever you take the dodge action while dual wielding, you can add an additional +1 to your AC when you do.
- **Unarmed Fighting:** You can choose to use your dexterity or strength modifier when making unarmed attacks. Your unarmed strikes can now deal bludgeoning damage equal to 1d8 + your Strength or Dexterity modifier on a hit. If you aren't wielding any weapons or a shield when you make the attack roll, the d8 becomes a d10. Unarmed attacks you make against creatures grappled by you instead also use a 1d10 for damage, instead of 1d8.
- **Point Blank Shooter:** You do not have disadvantage against creatures within 5ft of you, when making an attack with a ranged weapon. Your ranged weapon attacks also ignore half cover and three-quarters cover, so long as the target is still within 30ft of you. You gain +1 to all ranged attack rolls against creatures within 30ft of you.
- **Sea Monkey Style:** As long as you're not wearing armour you gain a climbing and swimming speed equal to your movement speed. Additionally, you can use the dodge roll flourish as a bonus action each turn, without spending stamina.

Evasion

Cost: 4 LP (Requirement: Must have at least 14 Dexterity)

When you purchase from this node, you gain the evasion ability. So long as you are not wearing heavy armour, when you are subjected to an effect that allows you to make a Dexterity saving throw to take only half damage, you instead take no damage if you succeed on the saving throw, and only half damage if you fail.

Extra Attack

Cost: 4 LP (Requirement: Level 5 or higher)

When you purchase from this node, you gain the Extra Attack Feature. When you make an attack as an action, you can make one additional attack.

You cannot purchase from this node again until you reach 10th level. If you purchase from this node a second time, you can now make one more additional attack when you use the extra attack feature.

After purchasing from this node for a second time, you cannot purchase from it again until you reach 15th level. If you purchase from this node a third time, you can now make one more additional attack when you use the extra attack feature.

After purchasing from this node for a third time, you cannot purchase from it again until you reach 20th level. If you purchase from this node a third time, you can now make one more additional attack when you use the extra attack feature.

The LP cost of this node increases by 2 each time you purchase from this node. (1st purchase costs 4LP, 2nd purchase costs 6LP, 3rd purchase costs 8LP and 4th purchase costs 10LP).

Grapple Move

Cost: 1 LP

When you successfully grapple a target creature, you can spend 1 stamina point to lock them into a specific type of grapple, using one of the grapple moves you know. When you purchase from this node you learn 2 grapple moves from the list below.

- **Choke Hold:** A creature grappled by you, with this grapple move, takes 1d6 bludgeoning damage at the start of each of your turns and cannot speak.
- **Meatshield:** While a creature is grappled by you, with this grapple move, any time you would take damage from an attack, you can spend your reaction to have this grappled creature take half as much of that damage, unless that attack comes from the Magic Missile spell.
- **Grab & Toss:** When a creature is grappled by you, with this grapple move, you can immediately toss that creature a number of feet equal to 10 + your athletics modifier. For each size larger the creature is than you, this distance decreases by 5ft. For every size category smaller the creature is than you, this distance is increased by 5ft.
- **RKO:** When a creature is grappled by you, with this grapple move, you immediately move that creature behind you. When you do, that creature falls prone and takes damage equal to your strength modifier.
- **Floored:** While a creature is grappled by you, with this grapple move, you and that creature both fall prone and remain prone until this grapple ends.
- **Nerve Pinch:** When a creature is first grappled by you, with this grapple move, they become stunned until the start of their next turn.
- **Hostage Hold:** When a creature grappled by you, with this grapple move, breaks free from your grapple, you can spend your reaction to make an attack against that creature.

This attack is made with advantage and the number needed to roll a critical hit is lowered by 1.

- **Reversal:** When you are grappled, you can spend 2 stamina to end the grapple as an action and then immediately make a grapple against the target who was grappling you. If you grapple them successfully, you may turn that grapple into any grapple move you know, without spending stamina to do so.

Everytime you purchase from this node, the size category of creature you are able to grapple increases by 1. If you grapple a creature that is larger than you, you must spend a number of stamina points equal to how many sizes larger this creature is to you, in order to grapple it.

Martial Art

Cost: 1 LP

When you purchase from this node for the first time you learn the “Breath” ability from this list below.

For each additional purchase you can choose an additional ability from the list below that you have not chosen previously:

- **Breath:** As a Bonus Action you can recover 1d4 stamina.
- **Balance:** You regain 1d4 of stamina at the end of your turn if you do not deal damage during it.
Additionally, you gain an additional stamina if you did not spend stamina this turn.
- **Dance:** When you use the Disengage Action you can move through enemy spaces. When you do so, you can spend 2 stamina to make an unarmed attack at disadvantage against a creature whose space you move through.
- **Strike:** When you hit a creature with an unarmed attack, instead of dealing damage, you can instead conduct one of the following effects:
 - *Grab:* grapple the target (if they are the same size as you or smaller)
 - *Push:* push them back 10ft
 - *Swap:* swap places with the creature
 - *Steal:* steal an item on their person that they are not wielding or wearing
 - *Trip:* knock them proneYou can spend 2 stamina to conduct 1 additional effect.
- **Trap:** When you are hit with a melee attack, and you have nothing in your hands, you can spend 1 stamina to attempt a grapple check against the attacker.
- **8-Arms:** You can spend 2 stamina as part of an unarmed attack, to turn the attack into 2 unarmed attacks but both are made at disadvantage.

Natural Defence

Cost: 3 LP

When you purchase from this node, you decide where your natural defences come from: Constitution (enduring attacks), Intelligence (calculating incoming attacks) or Wisdom (reading enemies movements and predicting their attacks).

Once you have done so, you can increase your natural defence by the modifier of that ability, so long as you are not wearing armour or wielding a shield. Your Natural Defence is the AC score you have while not wearing armour is typically 10 + your dexterity modifier. In this case, you may now also add the modifier of the chosen ability to this base AC.

You can purchase from this node an additional time once you reach 5th, 10th and 15th level, but the cost of this node will increase by 3 each time you purchase from it. (1st purchase costs 3LP, 2nd purchase costs 6LP, 3rd purchase costs 9LP) You cannot purchase from this node more than 3 times. Each time you purchase from this node, you may choose an additional ability modifier that you have not previously chosen to add to your natural defence AC alongside any of the other previously purchased abilities.

Stance

Cost: 1 LP

When you purchase from this node, you may choose 1 stance from the list below. You can spend 1 stamina and your bonus action to assume a stance, and continue to remain in this stance for 1 minute, or until you either change stances, dismiss your stance as a free action, or you fall unconscious.

- **Bounding Elk Stance:** Your movement speed is increased by 10ft and so long as you have moved on your turn, you gain a +2 bonus to all dexterity saving throws until the start of your next turn.
- **Charging Bull Stance:** After moving 20ft or more on your turn, all melee attacks you make after that deal an additional 2 damage and can push that creature 5ft.
- **Defending Tortoise Stance:** So long as you don't move on your turn, you gain a +2 bonus to your AC.
- **Fearful Bunny Stance:** As a reaction you can move up to half of your movement speed.
- **Flanking Wolf Stance:** You gain a +1 to attack rolls for each ally adjacent to a creature that you are attacking.
- **Grappling Serpent Stance:** Whenever you make a successful melee attack against a creature, you can attempt to grapple it.
- **Patient Heron Stance:** Whenever a creature comes within 5ft of you, you can make a melee attack roll against them as a reaction.

Unique Conditions

Blighted:

You cannot recover Hit Points

Burning:

Take 1d4 Fire Damage at the start of your turn.
You must instead spend an Action to end this condition.

Chilled:

You cannot move more than half your movement speed per round.

Eroded:

Your AC is reduced by 2.

Jolted:

You cannot take reactions and drop 1 item you were holding at the start of each of your turns.

Migraine:

You cannot Concentrate.

Winded:

You cannot speak or spend Stamina.

10. Copy of this License: You MUST include a copy of this License with every copy of the Open Game Content You Distribute.

11. Use of Contributor Credits: You may not market or advertise the Open Game Content using the name of any Contributor unless You have written permission from the Contributor to do so.

12. Inability to Comply: If it is impossible for You to comply with any of the terms of this License with respect to some or all of the Open Game Content due to statute, judicial order, or governmental regulation then You may not Use any Open Game Material so affected.

13. Termination: This License will terminate automatically if You fail to comply with all terms herein and fail to cure such breach within 30 days of becoming aware of the breach. All sublicenses shall survive the termination of this License.

14. Reformation: If any provision of this License is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable.

15. COPYRIGHT NOTICE Open Game License v 1.0a Copyright 2000, Wizards of the Coast, LLC. System Reference Document 5.1 Copyright 2016, Wizards of the Coast, LLC.; Authors Mike Mearls, Jeremy Crawford, Chris Perkins, Rodney Thompson, Peter Lee, James Wyatt, Robert J. Schwalb, Bruce R. Cordell, Chris Sims, and Steve Townshend, based on original material by E. Gary Gygax and Dave Arneson.

PRODUCT IDENTITY

The following items are designated Product Identity, as defined in Section 1(e) of the Open Gaming License Version 1.0a and are subject to the conditions set forth in Section 7 of the Open Gaming License, and are not Open Content:

All trademarks, registered trademarks, propernames, dialogue, plots, storylines, locations, characters, artworks, and trade dress. (Elements that have previously been designated as Open Game Content are not included in this declaration.)

OPEN GAMING CONTENT

All content from the System Reference Document 5.1 is Open Game Content as described in Section 1(d) of the License. No portion of this work other than the material designated as Open Game Content may be reproduced in any form without permission.
